Peter Lax, Mathematician Reuben Hersch, 2014-12-29 This book is a biography of one of the most famous and influential living mathematicians Peter Lax He is virtually unique as a preeminent leader in both pure and applied mathematics fields which are often seen as competing and incompatible Although he has been an academic for all of his adult life his biography is not without drama and tragedy Lax and his family barely escaped to the U S from Budapest before the Holocaust descended He was one of the youngest scientists to work on the Manhattan Project He played a leading role in coping with the infamous kidnapping of the NYU mathematics department's computer in 1970 The list of topics in which Lax made fundamental and long lasting contributions is remarkable scattering theory solitons shock waves and even classical analysis to name a few His work has been honored many times including the Abel Prize in 2005 The book concludes with an account of his most important mathematical contributions made accessible without heavy prerequisites Reuben Hersch has written extensively on mathematics His book with Philip Davis The Mathematical Experience won the National Book Award in science Hersch is emeritus professor of mathematics at the University of New Mexico

Remarkable Mathematicians Ioan James, 2002 This 2003 book contains portrayals of sixty mathematicians which collectively convey how mathematics developed into its modern form

Selected Papers on Number Theory and Algebraic Geometry Katsumi Nomizu, 1996 This book presents papers that originally appeared in the Japanese journal Sugaku from the Mathematical Society of Japan The papers explore the relationship between number theory and algebraic geometry

Guide to Information Sources in Mathematics and Statistics Martha A. Tucker, Nancy D. Anderson, 2004-09-30 This book is a reference for librarians mathematicians and statisticians involved in college and research level mathematics and statistics in the 21st century We are in a time of transition in scholarly communications in mathematics practices which have changed little for a hundred years are giving way to new modes of accessing information Where journals books indexes and catalogs were once the physical representation of a good mathematics library shelves have given way to computers and users are often accessing information from remote places Part I is a historical survey of the past 15 years tracking this huge transition in scholarly communications in mathematics Part II of the book is the bibliography of resources recommended to support the disciplines of mathematics

and statistics These are grouped by type of material Publication dates range from the 1800 s onwards Hundreds of electronic resources some online both dynamic and static some in fixed media are listed among the paper resources Amazingly a majority of listed electronic resources are free

Milnor-Witt Motives Tom Bachmann, Baptiste Calm  s, Fr  d  ric Digne, Jean Fasel, Paul Arne Hove, 2025-08-01 View the abstract

Wolf Prize in Mathematics Shiing-Shen Chern, Friedrich Hirzebruch, 2000 This invaluable book features bibliographies important papers and speeches for example at international congresses of Wolf Prize winners This is the first time that lectures by some Wolf Prize winners have been published together Since the work of the Wolf laureates covers a wide spectrum much of the mathematics of the twentieth century comes to life in this book

Selected Papers Ennio De Giorgi, 2013-12-17 The book contains a selection of 43 scientific papers by the great mathematician Ennio De Giorgi 1928 1996 which display the broad range of his achievements and his entire intellectual career as a problem solver and as a proponent of deep and ambitious mathematical theories All papers are written in English and 17 of them appear also in their original Italian version in order to give an impression of De Giorgi s original style The editors also provide a short biography of Ennio De Giorgi and a detailed account of his scientific achievements ranging from his seminal paper on the solution of Hilbert s 19th problem to the theory of perimeter and minimal surfaces the theory of G convergence and the foundations of mathematics

Quantum Theory And Symmetries - Proceedings Of The International Symposium Vladimir K Dobrev, Heinz-dietrich Doebner, J-d Hennig, W Lucke, 2000-05-05 This volume gives a representative survey of recent developments in relativistic and non relativistic quantum theory which are related to the application of symmetries in their most general sense The corresponding mathematical notions are centered upon groups algebras and their generalizations and are applied in interaction with topology differential geometry functional analysis and related fields Special emphasis is on results in the following areas quantization methods nonlinear evolution equations foundation of quantum physics algebraic quantum field theory gauge and string theories quantum information quantum groups discrete symmetries
