Introduction to Acupressure & Qigong Ram Babu Sao, 2025-05-20. This book introduces Acupressure for headaches, heaviness in the head, dizziness, ringing in the ears, stiff shoulders arising from disorders of the autonomic nervous system, constipation, sluggishness, chills of the hands and feet, insomnia, malformations of the backbone frequent in middle age, and producing pain in the shoulders, arms, and hands, pains in the back, pains in the knees experienced during standing or going up or downstairs, tension, the balance of emotions, anxiety, grief, other emotional imbalances, and diseases that can be relieved with acupressure. Acupressure points can be used to enhance many aspects of life such as managing stress, relieving and preventing sports injuries, improving muscle tone and blood circulation, relieving neuromuscular problems, and a beauty treatment like improvement of skin condition and toning and relaxing the facial muscles which can lessen the appearance of wrinkles without drugs. However, acupressure is not a substitute for medical care; it is often an appropriate complementary treatment. The Acupressure points are located between the shoulder blades, the spine at the level of the heart, the soles of one's feet, and palms, and all over the body. Patients with life-threatening diseases and serious medical problems such as a stroke or heart attack or any serious medical condition should always consult their doctor and take treatment before using acupressure therapies. Acupressure is not an appropriate sole treatment for cancer, contagious skin diseases, or sexually transmitted diseases, but in conjunction with proper medical attention, however gentle acupressure can help soothe and relieve a patient's distress and diseases.
