Essentials of Psychological Assessment Supervision A. Jordan Wright, 2019-09-24 The only pocket size reference on supervising psychological testing and assessment In 2014 the American Psychological Association APA adopted a set of guidelines for clinical supervision for health service psychology While technically covered by these guidelines supervising clinical psychological assessment includes additional tasks such as ensuring accurate administration scoring and interpretation of tests and tensions Supervisors must often instruct supervisees on the data integration process which can involve more direct teaching than standard clinical supervision while encompassing the same interpersonal

therapeutic and less structured guiding aspects as psychotherapy supervision. It is increasingly common to view clinical supervision in the assessment process and supervision of psychotherapy as two significantly different tasks. Surprisingly, there is very little training and guidance available on appropriate effective and beneficial methods of psychological assessment supervision. *Essentials of Psychological Assessment Supervision* seeks to remedy the lack of literature in this area, offering guidance on supervising psychological testing and assessment. This much needed guide provides supervisors with authoritative up to date information on guidelines relevant to assessment supervision. Additionally, detailed coverage of supervision of cognitive, personality, emotional, psychoeducational, neuropsychological, forensic, and therapeutic assessments among others, provide supervisors with guidance and structure in the supervision process. Focusing on practical application, this book offers guidance on topics such as assessment models appropriate in different areas of assessment, diversity issues, evaluation and feedback of supervisee performance, and ethical, legal, and regulatory considerations relevant in each assessment context. An invaluable resource for practitioners, this book offers practical advice on supervising a wide range of clinical psychological assessments. Includes contributions from experts in their respective subfields. Provides guidance on incorporating new American Psychological Association (APA) and Society for Personality Assessment (SPA) guidelines into the supervision process. Fills an urgent need for an up to date reference on assessment supervision. *Essentials of Psychological Assessment Supervision* is a must have reference for both psychology practitioners who supervise the assessment process and instructors of psychological testing and assessment.
