provides an easy to follow treatment of the application of this new software which is rapidly becoming the preferred vehicle for the teaching of website design. Written by two experienced users the material is presented in a way that makes it ideal for students meeting the subject for the first time whether they are on an undergraduate or postgraduate course. The scope of the book includes the functionality of the software its installation and application and the design and operation of web based material using it. Coverage of the use of HTML and SQL is also included as is the design and implementation of on line databases. There are numerous examples to illustrate ideas and concepts. The examples provide a practical illustration of how the software may be used. At the conclusion of each chapter a set of exercises is provided to allow the reader to review and practice the material presented. A simple introduction for users with no previous experience of the design process. Abundant screen dumps and diagrams aid fast assimilation of the material. Accompanying website with a wide range of facilities.

The Changing Focus of Regulatory Frameworks Around the Globe and the Opportunities for Harmonization Violeta Stoyanova-Beninska, Armando Magrelli, Daniel O'Connor, 2025-08-25. Regulation related to the development, registration and monitoring of medicinal products has developed at different paces in regions of the world but the most quoted trigger for modern drug regulation is the thalidomide tragedy of the mid 20th century. In the past decades a lot of progress has been made in the application and evolution of regulatory legislative procedures for the benefit of patients and public health but also in driving and enabling innovation. Medicines development is a global endeavor and exchange of experience and knowledge between regulatory agencies working under different jurisdictions is not only necessary but seen increasingly as essential. There are several factors playing a role in this process. Patients are increasingly well informed about their disease, existing treatments and novel developments on the horizon and share information with others across regions. Scientific progress is facing a rapid development with impressive achievements in medicine, pharmacology, basic science and technical disciplines. With this we also face several novel challenges inherent with the possibilities that technology can provide e.g. whole genome sequencing, AI etc. Regulatory bodies are facing new challenges with decisions to be made faster for the sake of not delaying the availability and access to newly developed treatments. The COVID 19 crisis has only reiterated the need for collaboration, coherence and solidarity on a global scale. With this in mind we as guest editors are opening a research topic which is intended to invite experts from around the globe to contribute their views on the regulation of medicines today and in the future. More specifically we expect manuscripts related to the following topics: Summary of the key aspects of the 3 main regulatory frameworks globally: USA, Europe and Japan; commonalities and differences; Future changes to EU legislation; case study of drivers for change; Global trends in regulatory science that impact legislation, drug development and patient access; The importance of regulatory collaboration and harmonization and the role of not-for-profit organizations; Emerging regulatory frameworks: Africa, Latin America and the ROW; Reliance regulation: pros and cons; Is this the direction of travel? Novel regulatory procedures; case studies of innovation in regulatory practice; Future proofing the regulatory framework and

the role of horizon scanning Scientific advice and other regulatory support tools Clinical trials centralized versus decentralized Digital revolution impact of AI and ML Drug device combinations Specific regulatory pathways for innovative medicines Possibilities for regulatory convergence Type of articles expected but not limited to are Original articles Reviews
