Playing Gods Andrew M Feldherr,2010-08-16 This book offers a novel interpretation of politics and identity in Ovid's epic poem of transformations the *Metamorphoses* Reexamining the emphatically fictional character of the poem *Playing Gods* argues that Ovid uses the problem of fiction in the text to redefine the power of poetry in Augustan Rome The book also provides the fullest account yet of how the poem relates to the range of cultural phenomena that defined and projected Augustan authority including spectacle theater and the visual arts Andrew Feldherr argues that a key to the political as well as literary power of the *Metamorphoses* is the way it manipulates its readers awareness that its stories cannot possibly be true By continually juxtaposing the imaginary and the real Ovid shows how a poem made up of fictions can and cannot acquire the authority and presence of other discursive forms One important way that the poem does this is through narratives that create a double vision by casting characters as both mythical figures and enduring presences in the physical landscapes of its readers This narrative device creates the kind of tensions between identification and distance that Augustan Romans would have felt when experiencing imperial spectacle and other contemporary cultural forms Full of original interpretations *Playing Gods* constructs a model for political readings of fiction that will be useful not only to classicists but to literary theorists and cultural historians in other fields

Transforming Socio-Natures in Turkey Onur İnal,Ethemcan Turhan,2019-07-09 This book is an exploration of the environmental makings and contested historical trajectories of environmental change in Turkey Despite the recent proliferation of studies on the political economy of environmental change and urban transformation until now there has not been a sufficiently complete treatment of Turkey's troubled environments which live on the edge both geographically between Europe and Middle East and politically between democracy and totalitarianism The contributors to *Transforming Socio Natures in Turkey* use the toolbox of environmental humanities to explore the main political cultural and historical factors relating to the country's socio environmental problems This leads not only to a better grounding of some of the historical and contemporary debates on the environment in Turkey but also a deeper understanding of the multiplicity of framings around more than human interactions in the country in a time of authoritarian populism This book will be of interest not only to students of Turkey from a variety of social science and humanities disciplines but also contribute to the larger debates on environmental change and developmentalism in the context of a global populist turn

A Companion to Naturalism David Papineau,David Macarthur,Mario De Caro,Flávia Carvalho Chagas,Clademir Luís Araldi,José Eduardo Porcher,Nythamar de Oliveira,Fabrício Pontin,Felipe Karasek,Adriano Naves de Brito,Sofia Albornoz Stein,Ruth Garret Millikan,Evandro Barbosa,João Hobuss,Susana Nucettelli,Thomas Sukopp,Luís Rosa,Jack Ritchie, Offering a engaging and accessible portrait of the current state of the field *A Companion to Naturalism* shows students how to think about the relation between Philosophy and Science and why is both essential and

fascinating to do so All the authors in this collection reconsider the core questions in Philosophical Naturalism in light of the challenges raised in Contemporary Philosophy They explore how philosophical questions are connected to vigorous current debates including complex questions about metaphysics semantics religion intentionality pragmatism reductionism ontology metaethics mind science belief and delusion among others showing how these issues and philosopher s attempts to answer them matter in the Philosophy In this sense this collection is also compelling and illuminating reading for philosophers philosophy students and anyone interested in Naturalism and their place in current discussions

The Sacred & the Digital F.G. (Frank) Bosman,2019-04-18 Video game studies are a relative young but flourishing academic discipline But within game studies however the perspective of religion and spirituality is rather neglected both by game scholars and religion scholars While religion can take different shapes in digital games ranging from material and referential to reflexive and ritual it is not necessarily true that game developers depict their in game religions in a positive confirming way but ever so often games approach the topic critically and disavowingly The religion criticisms found in video games can be categorized as follows religion as 1 fraud aimed to manipulate the uneducated as 2 blind obedience towards an invisible but ultimately non existing deity as 3 violence against those who do not share the same set of religious rules as 4 madness a deranged alternative for logical reasoning and as 5 suppression in the hands of the powerful elite to dominate and subdue the masses into submission and obedience The critical depictions of religion in video games by their developers is the focus of this special issue

The New Lives of Images Adrian J. Ivakhiv,2025-09-30 In this ambitious new work eco philosopher and cultural theorist Adrian Ivakhiv presents an incisive new way of thinking about images and imagination Drawing upon an immense range of materials Ivakhiv reassesses the place of imagination in cultural life analyzing how people have interacted with images in the past and the ways that digital media are profoundly altering these relationships today The book contributes powerfully to the study of visual culture and digital media and provides provocative interpretations of a range of important artists and media movements from the work of photographer Edward Burtynsky the ambitious multi screen installations of John Akomfrah the abstract art of Swedish spiritualist Hilma af Klint and the Afrofuturism of jazz musicians like Sun Ra and poet Alexis Pauline Gumbs to the ever expanding universe of animal videos on YouTube Along the way the book delves into animacy and religious imagery iconophilia and iconoclasm divination and prophecy truthiness and enchantment networks online communities and artificial intelligence the political and affective economies of digital media and the role of utopian futurism in the present climate colonial Anthropocene predicament The result is a vital contribution toward a more empowering conception of the creative imagination and its possibilities in today s emerging digital ecology

Earthing the Cosmic Christ of Ephesians—The

Universe, Trinity, and Zhiyi's Threefold Truth, Volume 1 John P. Keenan, 2021-07-28 This is the introductory volume of a multivolume verse by verse interfaith rereading of the New Testament letter to the Ephesians It looks to the Tiantai Buddhist master Zhiyi and his threefold truth to enhance our appreciation of nascent trinitarian themes in Ephesians And it draws upon a broad array of scientific theological and philosophical thinkers in aid of rejecting the epistle's ancient geocentric cosmology and its accommodations to the misogynistic patriarchal and slaveholding norms of its first century surroundings As a whole the work constitutes a twenty first century apologetic for doctrinal humility and for theologizing within a global theological commons

Reincarnation in America Lee Irwin, 2017-07-31 Reincarnation in America An Esoteric History surveys the complex history of reincarnation theories across multiple fields of discourse in a pre American context ranging from early Greek traditions to Medieval Christian theories Renaissance esotericism and European Kabbalah all of which had adherents that brought those theories to America Rebirth theories are shown in all these groups to be highly complex and often disjunctive with mainstream religions even though members of conventional religions frequently affirm the possibility of rebirth As a history of an idea reincarnation theory is a current vital belief pattern that cuts across a wide spectrum of social cultural and scientific domains in a long complex history not reducible to any specific religious or theoretical explanation This book is cross disciplinary and multicultural linking religious studies perspectives with science based research it draws upon many distinct disciplines and avoids reduction of reincarnation to any specific theory The underlying thesis is to demonstrate the complexity of reincarnation theories what is unique is the historical overview and the gradual shift away from religious theories of rebirth to new theories that are therapeutic and trans traditional

Nationhood, Providence, and Witness Carys Moseley, 2013-05-10 This book argues that problems with recognizing the State of Israel lie at the heart of approaches to nationhood and unease over nationalism in modern Protestant theology as well as modern social theory Three interrelated themes are explored The first is the connection between a theologian's attitude to recognizing Israel and their approach to the providential place of nations in the divine economy Following from this the argument is made that theologians' handling of both modern and ancient Israel is mirrored profoundly in the question of recognition and ethical treatment of the nations to which they belong along with neighboring nations The third theme is how social theory represented by certain key figures has handled the same issues Four major theologians are discussed Reinhold Niebuhr Rowan Williams John Milbank and Karl Barth Alongside them are placed social theorists and scholars of religion and nationalism including Mark Juergensmeyer Philip Jenkins Anthony Smith and Adrian Hastings In the process debates over the relationship between theology and social theory are reconfigured in concrete terms around the challenge of recognition of the State of Israel as well as stateless nations
