The Economic Policy of Online Media Peter Ayolov, 2023-05-05 This book explores the distortion of communication online centered around the theory that the economic policy model of online media is primarily based on the systematic manufacture of dissent Following the media criticism tradition of Habermas and Chomsky among others the book shows how anger can motivate news consumption as the principle of divide and rule in the online media of the 21st century is systematically applied The author posits that media addiction increases interest therefore deliberate distortion of facts and the manufacture of dissent provide the media with a larger audience and this becomes the business model This insightful volume will interest researchers scholars and students of media economics political economy of media digital media propaganda mass communication and media literacy

The problem of theatrical autonomy Joshua Edelman, Quirijn Lennert van den Hoogen, Louise Ejgod Hansen, 2017-02-07 When we go to the theatre we understand that we are doing something different It is not just that sitting and watching others for two hours or performing for others gazes is different than other daily activities It is that theatre itself is a particular social setting obeying its own rules and operating by its own standards That difference makes theatre feel free and unencumbered by many of the things that tie us to society and the world in the rest of our lives And yet of course this feeling is misleading Theatre may be distinct but it is still connected to the wider world Performances may be built out of the forms ideas and material from the real world and as audience members we may take the experiences stories and insights we find in the theatre with us when we leave and make use of them in our daily lives How is it then that theatre is distinct from and yet connected to the social world around it This book explores that question We aim to describe the particular relationship that theatre has to the larger social world how that relationship works what it enables theatre to do and how it can change

Making Laws That Work David Goddard, 2022-07-14 This book examines why laws fail and provides strategies for making laws that work Why do some laws fail And how can we make laws that actually work This helpful guide written by a leading jurist provides answers to these questions and gives practical strategies for law making It looks at a range of laws which have failed the damp squibs that achieve little or nothing in practice laws that

overshoot their policy goals laws that produce nasty surprises and laws that backfire undermining the very goals they were intended to advance It goes on to examine some of the reasons why such failures occur drawing on insights from psychology and economics including the work of Kahneman and others on how humans develop narratives about the ways in which the world works and make predictions about the future It provides strategies to reduce the risk of failure of legislative projects including adopting a more structured and systematic approach to analysing the likely effects of the legislation ensuring we identify the limits of our knowledge and the uncertainties of our predictions and framing laws in a way that enables us to adjust the way they operate as new information becomes available or circumstances change Key themes include the importance of the institutions that administer the legislation of default outcomes and of the stickiness of those defaults The book concludes with helpful checklists of questions to ask and issues to consider which will be of benefit to anyone involved in designing legislation
