address all dimensions of diversity that have an impact on literacy achievement. Leading experts examine how teaching and learning intersect with cultural and language differences and socioeconomic disparities in today's increasingly diverse schools and communities. The volume weaves compelling research findings together with theory, policy considerations, and discussions of exemplary instructional practices. It offers fresh perspectives on such topics as family literacy, multiliteracies, drawing on cultural resources in the classroom, factors that promote success in high-poverty schools, equity issues, and ways to teach specific literacy skills. The concluding section provides crucial recommendations for teacher preparation and professional development.

Cognition, Metacognition, and Culture in STEM Education Yehudit Judy Dori, Zemira R. Mevarech, Dale R. Baker, 2017-12-01. This book addresses the point of intersection between cognition, metacognition, and culture in learning and teaching Science, Technology, Engineering, and Mathematics (STEM). We explore theoretical background and cutting-edge research about how various forms of cognitive and metacognitive instruction may enhance learning and thinking in STEM classrooms from K-12 to university and in different cultures and countries. Over the past several years, STEM education research has witnessed rapid growth, attracting considerable interest among scholars and educators. The book provides an updated collection of studies about cognition, metacognition, and culture in the four STEM domains. The field of research on cognition and metacognition in STEM education still suffers from ambiguity in meanings of key concepts that various researchers use. This book is organized according to a unique manner. Each chapter features one of the four STEM domains and one of the three themes: cognition, metacognition, and culture, and defines key concepts. This matrix-type organization opens a new path to knowledge in STEM education and facilitates its understanding. The discussion at the end of the book integrates these definitions for analyzing and mapping the STEM education research. Chapter 4 is available open access under a Creative Commons Attribution 4.0 International License via link.springer.com.

ICT Education George Wells, Monelo Nxosi, Bobby Tait, 2022-01-01. This book constitutes the refereed proceedings of the 49th Annual Conference of the Southern African Computer Lecturers Association on ICT Education (SACLA 2019) held in a virtual mode in South Africa in July 2020. The 13 revised full papers presented were carefully reviewed and selected from 55 submissions. The papers focus on practical experiences in computing education, novel tools for learning and/or assessment, and research investigating aspects of computing education.
