Principles Of Engineering Pltw Study Guide:

Engineering in Pre-college Settings Şenay Purzer,Johannes Strobel,Monica E. Cardella,2014 In science technology engineering and mathematics STEM education in pre college engineering is not the silent e anymore There is an accelerated interest in teaching engineering in all grade levels Structured engineering programs are emerging in schools as well as in out of school settings Over the last ten years the number of states in the US including engineering in their K 12 standards has tripled and this trend will continue to grow with the adoption of the Next Generation Science Standards The interest in pre college engineering education stems from three different motivations First from a workforce pipeline or pathway perspective researchers and practitioners are interested in understanding precursors influential and motivational factors and the progression of engineering thinking Second from a general societal perspective technological literacy and understanding of the role of engineering and technology is becoming increasingly important for the general populace and it is more imperative to foster this understanding from a younger age Third from a STEM integration and education perspective engineering processes are used as a context to teach science and math concepts This book addresses each of these motivations and the diverse means used to engage with them Designed to be a source of background and inspiration for researchers and practitioners alike this volume includes contributions on policy synthesis studies and research studies to catalyze and inform current efforts to improve pre college engineering education The book explores teacher learning and practices as well as how student learning occurs in both formal settings such as classrooms and informal settings such as homes and museums This volume also includes chapters on assessing design and creativity

Engineering in K-12

Education National Research Council,National Academy of Engineering,Committee on K-12 Engineering Education,2009-09-08 Engineering education in K 12 classrooms is a small but growing phenomenon that may have implications for engineering and also for the other STEM subjects science technology and mathematics Specifically engineering education may improve student learning and achievement in science and mathematics increase awareness of engineering and the work of engineers boost youth interest in pursuing engineering as a career and increase the technological literacy of all students The teaching of STEM subjects in U S schools must be improved in order to retain U S competitiveness in the global economy and to develop a workforce with the knowledge and skills to address technical and technological issues Engineering in K 12 Education reviews the scope and impact of engineering education today and makes several recommendations to address curriculum policy and funding issues The book also analyzes a number of K 12 engineering curricula in depth and discusses what is known from the cognitive sciences about how children learn

engineering related concepts and skills Engineering in K 12 Education will serve as a reference for science technology engineering and math educators policy makers employers and others concerned about the development of the country s technical workforce The book will also prove useful to educational researchers cognitive scientists advocates for greater public understanding of engineering and those working to boost technological and scientific literacy

Examination of the U.S. Air Force's Science, Technology, Engineering, and Mathematics (STEM) Workforce Needs in the Future and Its Strategy to Meet Those Needs National Research Council, Division on Engineering and Physical Sciences, Air Force Studies Board, Committee on Examination of the U.S. Air Force's Science, Technology, Engineering, and Mathematics (STEM) Workforce Needs in the Future and Its Strategy to Meet Those Needs, 2010-11-09 The Air Force requires technical skills and expertise across the entire range of activities and processes associated with the development fielding and employment of air space and cyber operational capabilities The growing complexity of both traditional and emerging missions is placing new demands on education training career development system acquisition platform sustainment and development of operational systems While in the past the Air Force s technologically intensive mission has been highly attractive to individuals educated in science technology engineering and mathematics STEM disciplines force reductions ongoing military operations and budget pressures are creating new challenges for attracting and managing personnel with the needed technical skills Assessments of recent development and acquisition process failures have identified a loss of technical competence within the Air Force that is in house or organic competence as opposed to contractor support as an underlying problem These challenges come at a time of increased competition for technical graduates who are U S citizens an aging industry and government workforce and consolidations of the industrial base that supports military systems In response to a request from the Deputy Assistant Secretary of the Air Force for Science Technology and Engineering the National Research Council conducted five fact finding meetings at which senior Air Force commanders in the science and engineering acquisition test operations and logistics domains provided assessments of the adequacy of the current workforce in terms of quality and quantity
