*Critical Interventions in the Ethics of Healthcare* Dave Holmes,2016-04-22 *Critical Interventions in the Ethics of Healthcare* argues that traditional modes of bioethics are proving incommensurable with burgeoning biotechnologies and consequently emerging subjectivities Drawn from diverse disciplines this volume works toward a new mode of discourse in bioethics offering a critique of the current norms and constraints under which Western healthcare operates The contributions imagine

new less paternalistic terms by which bioethics might proceed terms that do not resort to exclusively Western models of liberal humanism or to the logic of neoliberal economies It is argued that in this way we can begin to develop an ethical vocabulary that does justice to the challenges of our age Bringing together theorists practitioners and clinicians to present a wide variety of related disciplinary concerns and perspectives on bioethics this volume challenges the underlying assumptions that continue to hold sway in the ethics of medicine and health sciences Why the Church Needs Bioethics Zondervan,2011-07-05 In a world where incredible medical technologies are possible does can do mean should do Why the Church Needs Bioethics helps you understand and constructively engage bioethical challenges with the resources of Christian wisdom and ministry Three rich and true to life case studies illustrate the urgency of such bioethical issues as reproductive and genetic technologies abortion forgoing treatment assisted suicide stem cell research and human enhancement technologies Leading Christian voices bring biblical and theological perspective to bear on the incredible medical technologies available today mobilize useful insights from health care law and business and demonstrate the powerful ways the church can make a difference through counseling pastoral care intercultural ministry preaching and education This book equips students church and lay leaders and people in health related fields with the knowledge to make faithful bioethical decisions and to help foster a world where human beings are shown respect as people created in the image of God Contributors to Why the Church Needs Bioethics include leading Bible and theology scholars such as D A Carson and Kevin Vanhoozer leaders in the areas of preaching Greg Scharf and ethics Scott Rae and 15 other experts in the fields of biblical theological studies ministry communication business law healthcare and bioethics Bioethics and Disability Alicia Ouellette,2011-04-25 Bioethics and Disability provides tools for understanding the concerns fears and biases that have convinced some people with disabilities that the health care setting is a dangerous place and some bioethicists that disability activists have nothing to offer bioethics It wrestles with the charge that bioethics as a discipline devalues the lives of persons with disabilities arguing that reconciling the competing concerns of the disability community and the autonomy based approach of mainstream bioethics is not only possible but essential for a bioethics committed to facilitating good medical decision making and promoting respect for all persons regardless of ability Through in depth case studies involving newborns children and adults with disabilities it proposes a new model for medical decision making that is both sensitive to and sensible about the fact of disability in medical cases From Critique to Action Nabil Sultan,David Weir,2011-05-25 This book illustrates the application of ethical thinking to business management and computing The authors are not professional philosophers but lecturers researchers and practitioners based at Liverpool Hope University LHU and other international institutes who have a particular approach that will appeal to pedagogic and scholarly interests as well as to more general readers Some of the authors are faculty colleagues at LHU others are directly or indirectly connected with it through teaching and or research cooperation At LHU the ethical dimension runs through every aspect of its corporate life it is

embodied in its corporate mission statement that gives its teaching and research a special flavour touching other people's lives and professional practice This book brings together some significant areas of leading edge research and scholarship in the context of engagement with communities of practice locally regionally and professionally with international students police teachers housing managers ambulance workers etc Most of the chapters are based on the practical experience of the contributors but written in an accessible way There is a strong intercultural and transnational flavour in this book It is explicitly cross disciplinary and will appeal to readers from areas like organization analysis computer studies and information systems as well as philosophy and ethics      Brain, Body, and Mind Walter Glannon, 2011-04-29 This book is a discussion of the most timely and contentious issues in the two branches of neuroethics the neuroscience of ethics and the ethics of neuroscience Drawing upon recent work in psychiatry neurology and neurosurgery it develops a phenomenologically inspired theory of neuroscience to explain the brain mind relation      *Manipulation* Christian Coons, Michael Weber, 2014 A great deal of scholarly attention has been paid to coercion Less attention has been paid to what might be a more pervasive form of influence manipulation The essays in this volume address this relative imbalance by focusing on manipulation examining its nature moral status and its significance in personal and social life      *Case Studies in Medical Ethics* Robert M. Veatch, 1977
