Principles Of Economics Great Minds Series:

Economics, Accounting and the True Nature of Capitalism Jacques Richard, Alexandre Rambaud, 2021-11-29 Almost all economists whether classical neoclassical or Marxist have failed in their analyses of capitalism to consider the underpinning systems of accounting This book draws attention to this lacuna focusing specifically on the concept of capital a major concept that dominates all teaching and practice in both economics and management It is argued that while for the practitioners of capitalism in accounting and business the capital in their accounts is a debt to be repaid or a thing to be kept for economists it has been considered a means or even a resource or an asset intended to be worn out This category error has led to economists failing to comprehend the true nature of capitalism On this basis this book proposes a new definition of capitalism that brings about considerable changes in the attitude to be had towards this economic system in particular the means to bring about its replacement This book will be of significant interest to readers of political economy history of economic thought critical accounting and heterodox economics

Great Minds of Business and Economics Henry Ford, Andrew Carnegie, Walter Bagehot, 2020-09-15 Three classic works on the art of succeeding in business life and high finance from three of modern history's most influential thought leaders My Life and Work A legendary inventor and industrialist Henry Ford pioneered the American automotive industry In this combination of memoir and business treatise he describes his early life as a mechanically inclined farmer's son the inner workings of his eponymous motor company and the development of the Model T He also discusses key workplace principles such as compensating workers beyond the prevailing wage and building a diverse workforce The Autobiography of Andrew Carnegie Scottish immigrant Andrew Carnegie worked his way up from bobbin boy to telegraph operator to railroad man learning lessons along the way that would lead to his unparalleled success in the steel industry In this acclaimed memoir he shares his story of living the American dream as well as insights on education business and the need to give back for the common good Lombard Street Written in response to a nineteenth century banking crisis in England Walter Bagehot's influential treatise was one of the first to clearly explain complex financial systems in accessible language As editor in chief of the Economist Bagehot also makes proposals for strengthening the economy such as allowing irresponsible banks to collapse and creating strong central banks to combat inflation His insights are as relevant today as they were when the book was first published in 1873

The Economy, Present Continuous: Theory Of Economic Time Elena Popkova, 2023-12-27 This book explains complex scientific concepts using simple and understandable illustrations and practical examples For example the competition between countries in the world economy is compared to motor racing time savings are illustrated through the example of a masquerade ball and the cyclical effect of time on the economy is reflected through the prism of changing seasons It presents amazing phenomena and processes of economic time including economic vintage the time machine in the economy youth and old age of the economy its growing up the economic calendar catching up and forward looking development This book will

therefore be interesting not only to members of the scientific community but also to non academic readers to everyone who wants to understand the nature of economic time

Encyclopedia of Data Science and Machine Learning Wang, John, 2023-01-20 Big data and machine learning are driving the Fourth Industrial Revolution With the age of big data upon us we risk drowning in a flood of digital data Big data has now become a critical part of both the business world and daily life as the synthesis and synergy of machine learning and big data has enormous potential Big data and machine learning are projected to not only maximize citizen wealth but also promote societal health As big data continues to evolve and the demand for professionals in the field increases access to the most current information about the concepts issues trends and technologies in this interdisciplinary area is needed The Encyclopedia of Data Science and Machine Learning examines current state of the art research in the areas of data science machine learning data mining and more It provides an international forum for experts within these fields to advance the knowledge and practice in all facets of big data and machine learning emphasizing emerging theories principals models processes and applications to inspire and circulate innovative findings into research business and communities Covering topics such as benefit management recommendation system analysis and global software development this expansive reference provides a dynamic resource for data scientists data analysts computer scientists technical managers corporate executives students and educators of higher education government officials researchers and academicians

African Economic Development Christopher Cramer, John Sender, Arkebe Oqubay, 2020 This book challenges conventional wisdoms about economic performance and possible policies for economic development in African countries Its starting point is the striking variation in African economic performance Unevenness and inequalities form a central fact of African economic experiences The authors highlight not only differences between countries but also variations within countries differences often organized around distinctions of gender class and ethnic identity For example neo natal mortality and school dropout have been reduced particularly for some classes of women in some areas of Africa Horticultural and agribusiness exports have grown far more rapidly in some countries than in others These variations and many others point to opportunities for changing performance reducing inequalities learning from other policy experiences and escaping the ties of structure and the legacies of a colonial past The book rejects teleological illusions and Eurocentric prejudice but it does pay close attention to the results of policy in more industrialized parts of the world Seeing the contradictions of capitalism for what they are fundamental and enduring may help policy officials protect themselves against the misleading idea that development can be expected to be a smooth linear process or that it would be were certain impediments suddenly removed The authors criticize a wide range of orthodox and heterodox economists especially for their cavalier attitude to evidence Drawing on their own decades of research and policy experience they combine careful use of available evidence from a range of African countries with political economy insights mainly derived from Kalecki Kaldor and Hirschman to make the policy case for specific types of public sector investment

China's Labor

Market in the Transition Chen Ying, 2024-07-22 This book explores the dynamics of the Chinese labor market the largest in the world The sheer scale of rural laborers living in cities is the ultimate engine driving the fastest urbanization the world has ever seen Today the country faces a series of new challenges as it tries to address problems of unemployment and under employment These include population ageing automation the increasing use of AI on the factory floor and other workplaces and Chinese manufacturers move up the value chain The book presents an empirically rich and analytically rigorous account of how these challenges might be met It will be of interest to labor economists scholars of Chinese manufacturing and researchers of the Chinese economy

Transformation of the economy Towards era 5.0 (Anna Szelągowska, Aneta Pluta-Zaremba) Anna Szelągowska, Aneta Pluta-Zaremba, 2021-10-20 Chapter 1 in Anna Szelągowska Aneta Pluta Zaremba ed *The Economics of Sustainable Transformation* London Routledge 2021

Pensionomics Matthias F. Jäkel, 2006-10-06 Pensionomics puts forward a portfolio perspective on the combination of funded and unfunded pension arrangements In a second best type argument it is formally shown that a Pay As You Go pension system can substitute the tradability of human capital While this ideal form of diversification can not be implemented due to the imperfection of capital markets one can design a typical Pay As You Go system in such a way that it allows for the same intertemporal consumption allocations as the first best solution

The End of Theory Richard Bookstaber, 2019-04-02 An in depth look at how to account for the human complexities at the heart of today's financial system Our economy may have recovered from the Great Recession but not our economics The End of Theory discusses why the human condition and the radical uncertainty of our world renders the standard economic model and the theory behind it useless for dealing with financial crises What model should replace it None At least not any version we've been using for the past two hundred years Richard Bookstaber argues for a new approach called agent based economics one that takes as a starting point the fact that we are humans not the optimizing automatons that standard economics assumes we are Sweeping aside the historic failure of twentieth century economics The End of Theory offers a novel perspective and more realistic framework to help prevent today's financial system from blowing up again
