Builders of the Vision Daniel Cardoso Llach,2015-06-05 Builders of the Vision traces the intellectual history and contemporary practices of Computer Aided Design CAD and Numerical Control since the years following World War II until today Drawing from primary archival and ethnographic sources it identifies and documents the crucial ideas shaping digital design technologies since the first numerical control and CAD systems were developed under US Air Force research contracts at MIT between 1949 and 1970 the cybernetic theorization of design as a human machine endeavor the vision of computers as perfect slaves taking care of the drudgery of physical labor the techno social utopias of computers as vehicles of democracy and social change the entrepreneurial urge towards design and construction integration and the managerial ideologies enabling today s transnational geographies of practice Examining the contrasting and often conflicting sensibilities that converge into CAD and BIM discourses globalism utopianism entrepreneurialism and architects desires for aesthetic liberation Builders of the Vision shows that software systems and numerically controlled machines are not merely instruments or tools but rather versatile metaphors reconfiguring conceptions of design materiality work and what it means to be creative Crucially by revealing software systems as socio technical infrastructures that mediate the production of our built environments author Daniel Cardoso Llach builds a strong case for the fields of architecture media and science and technology studies to critically engage with both the politics and the poetics of technology in design Builders of the Vision will be essential reading for scholars and practitioners across disciplines interested in the increasingly complex socio technical systems that go into imagining and building of our artifacts buildings and cities

BIM 3.0 Dal disegno alla simulazione Carlo Argiolas,Emanuela Quaquero,Riccardo Prenza,2016-01-03T00:00:00+01:00 I disegni esistono per rappresentare l edificio le simulazioni esistono per anticiparne le prestazioni Questo libro tratta di processi e nello specifico di Building Information Modeling pi comunemente conosciuto con l acronimo di BIM L accezione completa di BIM rimanda ad una filosofia di processo in cui l edificio viene costruito prima della sua effettiva realizzazione fisica all interno di un ambiente virtuale attraverso la collaborazione ed i contributi di tutti gli attori coinvolti nel progetto come architetti progettisti consulenti analisti energetici contractor fornitori facility manager e proprietari Caratteristica di questa filosofia un approccio altamente strategico al processo ed al raggiungimento degli obiettivi di progetto in cui l oggetto architettonico e le

sue prestazioni possono essere valutati nella loro interezza già in fase di progettazione. La considerazione dell'edificio si sposta quindi dal semplice prodotto architettonico ultimato al suo intero life cycle. La nascita di questa filosofia di processo dovuta alla sostanziale incapacità dei mezzi di progetto tradizionali di supportare il settore delle costruzioni di fronte alle complesse trasformazioni che caratterizzano il nostro tempo. Obiettivo dello studio quello di inserire in prima istanza il Building Information Modeling all'interno di una narrazione capace di trasmettere gli esiti operativi del concetto di simulazione rispetto al paradigma tradizionale di progetto. Il libro pertanto indirizzato a studenti e professionisti attivi nel settore delle costruzioni intende rappresentare sia un punto di arrivo che una base di lavoro per ulteriori ricerche.
