Rhetorical Analysis Packet:

Linguistic analysis of literary data Fareed Hameed Al-Hindawi, Musaab Al-Khazaali, 2017-03-15 Literary data is supposed to reflect real life situations and is at the same time written in a style of writing that is considered as highly elevated. Such reasons have prompted the contributors to this book to deal with this type of data. Such attempts range from semantics to stylistics and pragmatics. This book introduces linguistic analyses of literary data from different points of view. This involves dealing with various linguistic topics and different types of literary data. Hence many models are presented to analyze the linguistic aspects of those topics in the light of the genre in which those topics are undertaken. Accordingly different results are yielded from those analyses and this makes each type of analysis distinct from the other ones. It is hoped that this work will be a useful source to all those whether theoretically practically or both interested in linguistics pragmatics of literature applied linguistics and literary stylistics.

A section is also devoted to discussing rhetorical areas or genres namely contextual application of rhetoric and the challenges that arise such as strategic issues for management and corporate social responsibility. The final part seeks to answer questions about the book's contribution to the understanding of organizational rhetoric. It also examines what perspectives are lacking and what the future might hold for the study of organizational rhetoric. Examines the advantages and perils of organizations that seek to project their voices in order to shape society to their benefits. Contains
