Concepts of Nature R. J. Snell,Steven F. McGuire,2016-10-07 If natural law arguments struggle to gain traction in contemporary moral and political discourse could it be because we moderns do not share the understanding of nature on which that language was developed Building on the work of important thinkers of the last half century including Leo Strauss Eric Voegelin John Finnis and Bernard Lonergan the essays in *Concepts of Nature* compare and contrast classical medieval and modern conceptions of nature in order to better understand how and why the concept of nature no longer seems to provide a limit or standard for human action These essays also evaluate whether a rearticulation of pre modern ideas or perhaps a reconciliation or reconstitution on modern terms is desirable and or possible Edited by R J Snell and Steven F McGuire this book will be of interest to intellectual historians political theorists theologians and philosophers

Zorba the Buddha Hugh B. Urban,2016-01-12 *Zorba the Buddha* is the first comprehensive study of the life teachings and following of the controversial Indian guru known in his youth as Bhagwan Shree Rajneesh and in his later years as Osho 1931 1990 Most Americans today remember him only as the sex guru and the Rolls Royce guru who built a hugely successful but scandal ridden utopian community in central Oregon during the 1980s Yet Osho was arguably the first truly global guru of the twentieth century creating a large transnational movement that traced a complex global circuit from post Independence India of the 1960s to Reagan s America of the 1980s and back to a developing new India in the 1990s The Osho movement embodies some of the most important economic and spiritual currents of the past forty years emerging and adapting within an increasingly interconnected and conflicted late capitalist world order Based on extensive ethnographic and archival research Hugh Urban has created a rich and powerful narrative that is a must read for anyone interested in religion and globalization
