Programming Models for Parallel Computing, 2015 **Parallel Computing: Accelerating Computational Science and Engineering (CSE)** M. Bader, A. Bode, H.-J. Bungartz, 2014-03-31 Parallel computing has been the enabling technology of high end machines for many years Now it has finally become the ubiquitous key to the efficient use of any kind of multi processor computer architecture from smart phones tablets embedded systems and cloud computing up to exascale computers _x000D_ This book presents the proceedings of ParCo2013 the latest edition of the biennial International Conference on Parallel Computing held from 10 to 13 September 2013 in Garching Germany The conference focused on several key parallel computing areas Themes included parallel programming models for multi and manycore CPUs GPUs FPGAs and heterogeneous platforms the performance engineering processes that must be adapted to efficiently use these new and innovative platforms novel numerical algorithms and approaches to large scale simulations of problems in science and engineering _x000D_ The conference programme also included twelve mini symposia including an industry session and a special PhD Symposium which comprehensively represented and intensified the discussion of current hot topics in high performance and parallel computing These special sessions covered large scale supercomputing novel challenges arising from parallel architectures multi manycore heterogeneous platforms FPGAs multi level algorithms as well as multi scale multi physics and multi dimensional problems _x000D_ It is clear that parallel computing including the processing of large data sets Big Data will remain a persistent driver of research in all fields of innovative computing which makes this book relevant to all those with an interest in this field **A Practical Programming Model for the Multi-Core Era** Barbara Chapman, Weimin Zheng, Guang R. Gao, Mitsuhisa Sato, Eduard Ayguadé, Dongsheng Wang, 2008-06-11 This book constitutes the thoroughly refereed post workshop proceedings of the Third International Workshop on OpenMP IWOMP 2007 held in Beijing China in June 2007 The 14 revised full papers and 8 revised short papers presented were carefully reviewed and selected from 28 submissions The papers address all topics related to OpenMP such as OpenMP performance analysis and modeling OpenMP performance and correctness tools and proposed OpenMP extensions as well as applications in various domains e g scientific computation video games computer graphics multimedia information retrieval optimization text processing data mining finance signal and image processing and numerical solvers *Computational Technologies* Petr N. Vabishchevich, 2014-12-11 This book discusses questions of numerical solutions of applied problems on parallel computing systems Nowadays engineering and scientific computations are carried out on parallel computing systems which provide parallel data processing on a few computing nodes In the development of up to date applied software this feature of computers must be taken into account for the maximum efficient usage of their resources In constructing computational algorithms we should separate relatively independent subproblems in order to solve them on a single computing node **Proceedings of the Seventh SIAM Conference on Parallel Processing for Scientific Computing** David H.
