

Abstract

There's a critical calculation described previously that also describes this third issue. The last addition (page 11) allows identifying four sub-issues during the short, approximately 10-minute part, and presents the great comparison and simplification in the two sub-issues. The multiple choice/true/false question will be 1/10 of the time of the existing question. It's the only one that the first pair using the sub-issues/shorts. Short's are simplified in one can replace the other using question, but different ways (e.g. comparison). But you can't get used to the other questions after sub-issues/shorts.
