Kiefer,2012-12-06 In almost all principled accounts of questions questions are related to the corresponding answers Zellig Harris Harris 1978 1 for example maintains that all interrogative sentences can be derived by means of the independently established transformations of the

language from sentences which assert that someone is asking about a disjunction of statements which are the relevant possible answers to that interrogative. This amounts to the claim that a yes/no question such as 'Will John stay?' is derived from 'I ask you whether John will stay' and a wh question such as 'Who came?' is derived from something like 'I ask you whether A came or B came or ... or X came'. Though in generative grammar interrogatives are not derived from the corresponding declaratives, the semantic interpretation of questions is akin to the syntactic source of questions posited by Harris, Jerrold J. Katz and Paul M. Postal. Katz and Postal (1964: 113–117) state a reading rule for Q, the interrogative constituent, which boils down to 1 in the case of yes/no questions and to 2 in the case of wh questions.

- 1 Tell me which of the following is true: John will stay or John will not stay.
- 2 Tell me which of the following is true: A came or B came or ... or X came.

Thus, the semantic interpretation of questions makes reference to the set of possible answers represented here by a disjunction of statements.
