Palliative Care The 400 Year Quest For A Good Death:

Palliative Care Harold Y. Vanderpool, 2015-07-11 The long history of medical care for the dying has largely been neglected It began in 1605 when physicians were challenged to enable persons to die peacefully Today it includes palliation of oppressive symptoms emotional and psychological care and respect for the wishes and cultural backgrounds of patients and families Especially since the 1990s it embraces symptom easing palliation for patients with severe life limiting and chronic illnesses Providing a detailed picture of contemporary palliative care this book chronicles four centuries of the quest for a good death covering the fight against futile end of life treatments the history of life extending treatments and technologies the roles of nurses the liberation of the dying from isolation in hospitals and hard won victories to secure patients right to choose

A History of Palliative Care, 1500-1970 Michael Stolberg, 2017-04-28 This book on the history of palliative care 1500 1970 traces the historical roots of modern palliative care in Europe to the rise of the hospice movement in the 1960s The author discusses largely forgotten premodern concepts like cura palliativa and euthanasia medica and describes how patients and physicians experienced and dealt with terminal illness He traces the origins of hospitals for incurable and dying patients and follows the long history of ethical debates on issues like truth telling and the intentional shortening of the dying patients lives and the controversies they sparked between physicians and patients An eye opener for anyone interested in the history of ethical decision making regarding terminal care of critically ill patients

The Medicalization of Birth and Death Lauren K. Hall, 2019-12-17 Improving how individuals give birth and die in the United States requires reforming the regulatory reimbursement and legal structures that centralize care in hospitals and prevent the growth of community based alternatives In 1900 most Americans gave birth and died at home with minimal medical intervention By contrast most Americans today begin and end their lives in hospitals The medicalization we now see is due in large part to federal and state policies that draw patients away from community based providers such as birth centers and hospice care and toward the most intensive and costliest kinds of care But the evidence suggests that birthing and dying people receive too much even harmful medical intervention In *The Medicalization of Birth and Death* political scientist Lauren K Hall describes how and why birth and death became medicalized events While hospitalization provides certain benefits she acknowledges it also creates harms limiting patient autonomy driving up costs and causing a cascade of interventions many with serious side effects Tracing the regulatory legal and financial policies that centralize care during birth and death Hall argues that medicalization reduces competition stifles innovation and prevents individuals from accessing the most appropriate care during their most vulnerable moments She also examines the profound implications of policy enforced medicalization on informed consent and shows how medicalization challenges the healthcare community's most foundational ethical commitments Drawing on interviews with medical and nonmedical healthcare providers as well as surveys of patients and their families Hall provides a broad overview of the costs benefits and origins of medicalized birth

and death The Medicalization of Birth and Death is required reading for academics patients providers policymakers and anyone else interested in how policy shapes healthcare options and limits patients and providers during life s most profound moments

Challenges to the Global Issue of End of Life Care Pierre Mallia, Nathan Emmerich, Bert Gordijn, Francesca Pistoia, 2022-02-10 This book addresses the problems faced by people and hospitals dedicated to providing optimal end of life care and asks whether ethicists can function as experts on this subject Though ethics consultation is a growing practice in medical contexts difficult questions surrounding the role of ethicists in professional decision making remain The chapters in this book examine the nature and plausibility of moral expertise the relationship between character and expertise the nature and limits of moral authority the question of how one might become a moral expert and the trustworthiness of moral testimony This volume not only engages with the growing literature in the debate on end of life care but also offers new perspectives from both academics and practitioners Such perspectives include ways on how to get together to optimize end of life care This book is of particular interest to bioethicists clinicians ethics committees students of social epistemology patient groups and institutions especially religious who may not be sufficiently imparting the social teachings of end of life care It also shows how they are indeed stakeholders for what is today called a good death These new essays advance discussions and provide practical information on dying as well as acting as a guide to those interested in actively effecting change

Death and Dying Nicole Piemonte, Shawn Abreu, 2021-09-07 An examination of the contemporary medicalization of death and dying that calls us to acknowledge instead death's existential and emotional realities Death is a natural inevitable and deeply human process and yet Western medicine tends to view it as a medical failure In their zeal to prevent death physicians and hospitals often set patients and their families on a seemingly unstoppable trajectory toward medical interventions that may actually increase suffering at the end of life This volume in the MIT Press Essential Knowledge series examines the medicalization of death and dying and proposes a different approach one that acknowledges death's existential and emotional realities The authors one an academic who teaches and studies end of life care and the other a physician trained in hospice and palliative care offer an account of Western style death and dying that is informed by both research and personal experience They examine the medical profession's attitude toward death as a biological dysfunction that needs fixing describe the hospice movement as well as movements for palliative care and aid in dying and why they failed to influence mainstream medicine consider our reluctance to have end of life conversations and investigate the commodification of medicine and the business of dying To help patients die in accordance with their values they say those who care for the dying should focus less on delaying death by any means possible and more on being present with the dying on their journey
