## Quantifying Archaeology:

Quantifying Archaeology Stephen Shennan, 2014-05-19 This book introduces archaeologists to the most important quantitative methods from the initial description of archaeological data to techniques of multivariate analysis These are presented in the context of familiar problems in archaeological practice an approach designed to illustrate their relevance and to overcome the fear of mathematics from which archaeologists often suffer      **Quantitative Methods in Archaeology Using R** David L. Carlson, 2017-06-26 Quantitative Methods in Archaeology Using R is the first hands on guide to using the R statistical computing system written specifically for archaeologists It shows how to use the system to analyze many types of archaeological data Part I includes tutorials on R with applications to real archaeological data showing how to compute descriptive statistics create tables and produce a wide variety of charts and graphs Part II addresses the major multivariate approaches used by archaeologists including multiple regression and the generalized linear model multiple analysis of variance and discriminant analysis principal components analysis correspondence analysis distances and scaling and cluster analysis Part III covers specialized topics in archaeology including intra site spatial analysis seriation and assemblage diversity      *Archaeological Method and Theory* Linda Ellis, 2003-12-16 This Encyclopedia brings together the most recent scientific information on a collection of subjects that are too often and inconveniently treated in separate publications It provides a survey of archaeological method and theory as well as the application of physical and biological sciences in archaeological research Every aspect of archaeological work is represented from the discovery process to the ultimate disposition of materials Thus the reader will find entries on subject matter covering disciplinary theory legislation affecting the work of archaeologists pre excavation surveying excavation methodology on site conservation techniques post excavation analysis The rapid evolution of analytical technology is often superficially treated or not covered at all in textbooks or other commonly available sources Here the latest refinements in techniques such as radiometric dating stable isotopic analysis and the PCR technique of DNA analysis are presented clearly and authoritatively The discussion of these techniques is amplified by including results of the work of professionals conducting interdisciplinary research and by covering the methodological enhancements provided by the physical and natural sciences Cultural property legislation regardless of its country of origin has affected how archaeologists conduct their work This encyclopedia covers all major U S legislation developed for the protection of cultural property including the recent Native American Graves Protection and Repatriation Act and offers a substantial article on worldwide legislation concerning the reburial of human remains and its effects on the present and future practice of archaeology Without some sort of conservation program at the point of excavation valuable materials may be inadvertently contaminated or destroyed Many simple and low cost techniques to promote both sample integrity and long term preservation for major classes of materials are described in this volume Traditional treatments of method and theory usually focus on prehistoric periods and are limited in their geographic range This volume includes discussions based on

various historical periods on different continents as reflected in entries such as Historical Archaeology Industrial Archaeology Medieval Archaeology and Classical Archaeology

**Integrating Zooarchaeology and Paleoethnobotany** Amber VanDerwarker, Tanya M. Peres, 2010-01-22 In recent years scholars have emphasized the need for more holistic subsistence analyses and collaborative publications towards this endeavor have become more numerous in the literature However there are relatively few attempts to qualitatively integrate zooarchaeological animal and paleoethnobotanical plant data and even fewer attempts to quantitatively integrate these two types of subsistence evidence Given the vastly different methods used in recovering and quantifying these data not to mention their different preservational histories it is no wonder that so few have undertaken this problem Integrating Zooarchaeology and Paleoethnobotany takes the lead in tackling this important issue by addressing the methodological limitations of data integration proposing new methods and innovative ways of using established methods and highlighting case studies that successfully employ these methods to shed new light on ancient foodways The volume challenges the perception that plant and animal foodways are distinct and contends that the separation of the analysis of archaeological plant and animal remains sets up a false dichotomy between these portions of the diet In advocating qualitative and quantitative data integration the volume establishes a clear set of methods for 1 determining the suitability of data integration in any particular case and 2 carrying out an integrated qualitative or quantitative approach

*Analyse des données and archaeology fifty years later: from data analysis to data science* François Djindjian, Paola Moscati, 2025-06-30 The third volume of the 30 anni di informatica archeologica series focuses on the quantitative approach to archaeological data analysis and explores the fifty year evolution of *Analyse des Données* starting with Jean Paul Benz cri s seminal 1973 work The volume prefaced by Tito Orlandi features contributions from scholars directly involved in this evolution highlighting the role and influence of the French school of data analysis the dissemination of exploratory data analysis techniques and their legacy in contemporary Data Science tools

*A Dictionary of Archaeology* Ian Shaw, Robert Jameson, 2008-04-15 This dictionary provides those studying or working in archaeology with a complete reference to the field

**Computational and Machine Learning Tools for Archaeological Site Modeling** Maria Elena Castiello, 2022-01-24 This book describes a novel machine learning based approach to answer some traditional archaeological problems relating to archaeological site detection and site locational preferences Institutional data collected from six Swiss regions Zurich Aargau Grisons Vaud Geneva and Fribourg have been analyzed with an original conceptual framework based on the Random Forest algorithm It is shown how the algorithm can assist in the modelling process in connection with heterogeneous incomplete archaeological datasets and related cultural heritage information Moreover an in depth review of past and more recent works of quantitative methods for archaeological predictive modelling is provided The book guides the readers to set up their own protocol for i dealing with uncertain data ii predicting archaeological site location iii establishing environmental features importance iv and suggest a model validation procedure It addresses both academics and

professionals in archaeology and cultural heritage management and offers a source of inspiration for future research directions in the field of digital humanities and computational archaeology

**The Archaeology of Ethnicity** Siân Jones, 2002-11 The question of ethnicity is highly controversial in contemporary archaeology The author responds to the need for a reassessment of the ways in which social groups are identified in the archeological record

**The Archaeology of Mobility** Hans Barnard, Willeke Wendrich, 2008-12-31 There have been edited books on the archaeology of nomadism in various regions and there have been individual archaeological and anthropological monographs but nothing with the kind of coverage provided in this volume Its strength and importance lies in the fact that it brings together a worldwide collection of studies of the archaeology of mobility This book provides a ready made reference to this worldwide phenomenon and is unique in that it tries to redefine pastoralism within a larger context by the term mobility It presents many new ideas and thoughtful approaches especially in the Central Asian region

**The Archaeology of Town Creek** Edmond A. Boudreaux, III, 2007-11-04 Provides new insights into the community pattern and leadership roles at a major Mississippian archaeological site The sequence of change for public architecture during the Mississippian period may reflect a centralization of political power through time In the research presented here some of the community level assumptions attributed to the appearance of Mississippian mounds are tested against the archaeological record of the Town Creek site the remains of a town located on the northeastern edge of the Mississippian culture area In particular the archaeological record of Town Creek is used to test the idea that the appearance of Mississippian platform mounds was accompanied by the centralization of political authority in the hands of a powerful chief A compelling argument has been made that mounds were the seats and symbols of political power within Mississippian societies While platform mounds have been a part of Southeastern Native American communities since at least 100 B C around A D 400 leaders in some communities began to place their houses on top of earthen mounds an act that has been interpreted as an attempt to legitimize personal authority by a community leader through the appropriation of a powerful traditional community oriented symbol Platform mounds at a number of sites were preceded by a distinctive type of building called an earthlodge a structure with earth embanked walls and an entrance indicated by short parallel wall trenches Earthlodges in the Southeast have been interpreted as places where a council of community leaders came together to make decisions based on consensus In contrast to the more inclusive function proposed for pre-mound earthlodges it has been argued that access to the buildings on top of Mississippian platform mounds was limited to a much smaller subset of the community If this was the case and if ground level earthlodges were more accessible than mound summit structures then access to leaders and leadership may have decreased through time Excavations at the Town Creek archaeological site have shown that the public architecture there follows the earthlodge to platform mound sequence that is well known across the South Appalachian subarea of the Mississippian world The clear changes in public architecture coupled with the extensive exposure of the site s domestic sphere make Town Creek an excellent case study for examining the relationship among

changes in public architecture and leadership within a Mississippian society
