Questioning The Universe Concepts In Physics:

Questioning the Universe Ahren Sadoff, 2008-12-16 WINNER 2009 CHOICE AWARD OUTSTANDING ACADEMIC TITLE
The typical introduction to physics leaves readers with the impression that physics is about 30 different unconnected topics such as motion forces gravity electricity light heat energy and atoms More often than not these readers are left to conclude that physics is mostly about boring

New Universe Theory with the Laws of Physics Bobby McGehee, 2005 Big Bang Do you believe it I don't Being a career engineering physicist I always look for proof For 50 years I have tried to prove the BB to myself I have reviewed Slipher's red shift observation reinterpreted it and corrected Hubble's declaration the universe is not expanding and exploding to its death instead it is growing with vim and vigor Red shift defines velocity not acceleration or deceleration So I developed the New Universe Theory which is believable because it complies with known facts and the Laws of Physics

New Challenges in Space Plasma Physics: Open Questions and Future Mission Concepts Luca Sorriso-Valvo, Alessandro Retino, Christopher H. K. Chen, Daniel Verscharen, 2023-02-15

Phase Transitions in the Early Universe: Theory and Observations Héctor J. De Vega, Isaak M. Khalatnikov, Norma G. Sánchez, 2012-12-06 A fundamental profound review of the key issues relating to the early universe and the physical processes that occurred in it The interplay between cosmic microwave background radiation large scale structure and the dark matter problem are stressed with a central focus on the crucial issue of the phase transitions in the early universe and their observable consequences baryon symmetry baryogenesis and cosmological fluctuations There is an interplay between cosmology statistical physics and particle physics in studying these problems both at the theoretical and the experimental observational levels Special contributions are devoted to primordial and astrophysical black holes and to high energy cosmic rays and neutrino astrophysics There is also a special section devoted to the International Space Station and its scientific utilization

Old and New Questions in Physics, Cosmology, Philosophy, and Theoretical Biology Alwyn Van der Merwe, 2012-12-06 Simply to say that this is a collection of essays in honor of the late Wolfgang Yourgrau 1908-1979 is to explain at least for the obviously many insiders the unusually wide ranging title of the present volume In a Foreword to the Proceedings of the First International Colloquium focusing on logic physical reality and history held at the University of Denver in May of 1966 under their leadership Wolfgang Yourgrau and Allen Breck wrote in an oblique reference to C P Snow Indeed there are not two or three or four cultures there is only one culture our generation has lost its awareness of this Historians logicians physicists all are banded in one common enterprise namely in their desire to weave an enlightened fabric of human knowledge Augment if you will the foregoing categories of scholars with biologists philosophers cosmologists and theologians all of whom in addition to historians Wolfgang Yourgrau by dint of his inextinguishable enthusiasm and charismatic qualities assembled in Denver for the Second and Third International Colloquia in 1967 and 1974 respectively and a few other besides and one arrives at a statement of the credo which Yourgrau not only professed but consistently exemplified throughout his adult life
