Questions Jan-Peter de Ruiter, 2012 The view that questions are requests for missing information is too simple when language use is considered Formally utterances are questions when they are syntactically marked as such or by prosodic marking Functionally questions request that certain information is made available in the next conversational turn But functional and formal questionhood are independent what is formally a question can be functionally something else for instance a statement a complaint or a request Conversely what is functionally a question is often expressed as a statement Also verbal signals such as eye gaze head nods or even practical actions can serve information seeking functions that are very similar to the function of linguistic questions With original cross cultural and multidisciplinary contributions from linguists anthropologists psychologists and conversation analysts this book asks what questions do and how a question can shape the answer it evokes

Drawn from the Ground Jennifer Green, 2014-05-08 Sand stories from Central Australia are a traditional form of Aboriginal women s verbal art that incorporates speech song sign gesture and drawing Small leaves and other objects may be used to represent story characters This detailed study of Arandic sand stories takes a multimodal approach to the analysis of the stories and shows how the expressive elements used in the stories are orchestrated together This richly illustrated volume is essential reading for anyone interested in language and communication It adds to the growing recognition that language encompasses much more than speech alone and shows how important it is to consider the different semiotic resources a culture brings to its communicative tasks as an integrated whole rather than in isolation

A typology of questions in Northeast Asia and beyond Andreas Hölzl, 2018-08-29 This study investigates the distribution of linguistic and specifically structural diversity in Northeast Asia NEA defined as the region north of the Yellow River and east of the Yenisei In particular it analyzes what is called the grammar of questions GQ i e those aspects of any given language that are specialized for asking questions or regularly combine with these The bulk of the study is a bottom up description and comparison of GQs in the languages of NEA The addition of the phrase and beyond to

the title of this study serves two purposes First languages such as Turkish and Chuvash are included despite the fact that they are spoken outside of NEA since they have ties to or even originated in the region Second despite its focus on one area the typology is intended to be applicable to other languages as well Therefore it makes extensive use of data from languages outside of NEA The restriction to one category is necessary for reasons of space and clarity and the process of zooming in on one region allows a higher resolution and historical accuracy than is usually the case in linguistic typology The discussion mentions over 450 languages and dialects from NEA and beyond and gives about 900 glossed examples The aim is to achieve both a cross linguistically plausible typology and a maximal resolution of the linguistic diversity of Northeast Asia The Book of Answers Tanya Stivers, 2022 Imagine for a moment the only way to confirm a yes no question was by saying Yeah How different would this make our communication Relying on a large corpus of naturally occurring recordings of spontaneous social interaction this book explores all of the ways that we confirm questions in our everyday social lives Tanya Stivers analyzes what these different ways of responding allow us to do that is unique to each answer type When do we answer with Yeah rather than He is for instance or when do we use more complicated forms of confirming This information provides us with the basic response possibility space From that point we can examine what the range of responses in particular answers tells us about what is important to us in managing social relationships through social interaction The book explains that we can conceptualize the response possibility space as having three dimensions alignment autonomy and affiliation Speakers rely on the details of their response to position themselves at a particular point in that three dimensional space sometimes accepting trade offs among the dimensions to achieve a stance that is higher in alignment and autonomy and lower in affiliation or higher in affiliation and autonomy but lower in alignment The Book of Answers uses real life conversations to find hidden patterns in how we do things together such as reach decisions tell stories or arrive at agreement or disagreement Delving into the science of how we talk this book investigates what those patterns tell us about human communication and our social lives

Body - Language - Communication.
