Pettersen,P. Fox,N. Satofuka,A. Ecer,Jacques Periaux,2001-04-27 Parallel CFD 2000 the Twelfth in an International series of meetings featuring computational fluid dynamics research on parallel computers was held May 22 25 2000 in Trondheim Norway Following the trend of the past conferences areas such as numerical schemes and algorithms tools and environments load balancing as well as interdisciplinary topics and various kinds of industrial applications were all well represented in the work presented In addition for the first time in the Parallel CFD conference series the organizing committee chose to draw special attention to certain subject areas by organizing a number of special sessions We feel the emphasis of the papers presented at the conference reflect the direction of the research within parallel CFD at the beginning of the new millennium It seems to be a clear tendency towards increased industrial exploitation of parallel CFD Several presentations also demonstrated how new insight is being achieved from complex simulations and how powerful parallel computers now make it possible to use CFD within a broader interdisciplinary setting Obviously successful application of parallel CFD still rests on the underlying fundamental principles Therefore numerical algorithms development tools and parallelization techniques are still as important as when parallel CFD was in its infancy Furthermore the novel concepts of affordable parallel computing as well as metacomputing show that exciting developments are still taking place As is often pointed out however the real power of parallel CFD comes from the combination of all the disciplines involved Physics mathematics and computer science This is probably one of the principal reasons for the continued popularity of the Parallel CFD Conferences series as well as the inspiration behind much of the excellent work carried out on the subject We hope that the papers in this book both on an individual basis and as a whole will contribute to that inspiration Further details of Parallel CFD 99 as well as other conferences in this series are available at <http://www.parcfd.org> *Parallel Computational Fluid Dynamics* Kenli Li,Zheng Xiao,Yan Wang,Jiayi Du,Keqin Li,2014-03-08 This book constitutes the refereed proceedings of the 25th International Conference on Parallel Computational Fluid Dynamics ParCFD 2013 held in Changsha China in May 2013 The 35 revised full papers presented were carefully reviewed and selected from more than 240 submissions The papers address issues such as parallel algorithms developments in software tools and environments unstructured adaptive mesh applications industrial applications atmospheric and oceanic global simulation interdisciplinary applications and evaluation of computer architectures and software environments *Parallel Computational Fluid Dynamics 2007* Ismail H. Tuncer,Ülgen Gülcat,David R. Emerson,Kenichi Matsuno,2009-04-21 At the 19th Annual Conference on Parallel Computational Fluid Dynamics held in Antalya Turkey in May 2007 the most recent developments and implementations of large scale and grid computing were presented This book comprised of the invited and selected papers of this conference details those advances which are of particular interest to CFD and CFD related communities It also offers the results related to applications of various scientific and engineering problems involving flows and flow related topics Intended for CFD researchers and graduate students this book is a state of the art presentation of the relevant methodology and implementation techniques of

large scale computing **Computational Science and High Performance Computing** Egon Krause, Yuri I. Shokin, Nina Shokina, 2006-08-10 This volume is published as the proceedings of the Russian German Advanced Research workshop on Computational Science and High Performance Computing in Novosibirsk Akademgorodok in September 2003. The contributions of these proceedings were provided and edited by the authors chosen after a careful selection and reviewing. The workshop was organized by the Institute of Computational Technologies SB RAS Novosibirsk Russia and the High Performance Computing Center Stuttgart, Stuttgart, Germany. The objective was the discussion of the latest results in computational science and to develop a close cooperation between Russian and German specialists in the above mentioned field. The main directions of the workshop are associated with the problems of computational hydrodynamics, application of mathematical methods to the development of new generation of materials, environment protection problems, development of algorithms, software and hardware support for high performance computation and designing modern facilities for visualization of computational modelling results. The importance of the workshop topics was confirmed by the participation of representatives of major research organizations engaged in the solution of the most complex problems of mathematical modelling, development of new algorithms, programs and key elements of new information technologies. Among the Russian participants were researchers of the Institutes of the Siberian Branch of the Russian Academy of Sciences: Institute of Computational Technologies, Institute of Computational Mathematics and Mathematical Geophysics, Institute of Computational Modelling, Russian Federal Nuclear Center, All Russian Research Institute of Experimental Physics, Novosibirsk State University.
