Multiplicity The New Science Of Personality Identity And The Self:

Multiplicity Rita Carter,2008 Multiplicity Rita Carter,2008 Rita Carter brings to light this new and vital understanding of personality Rita explains that inside every individual is a team of personalities working together to give the impression of one unified self *The Wise Leader* Paul Lawrence,Suzi Skinner,2023-08-04 The Wise Leader offers readers a succinct perspective on wise leadership based on theory practice and the authors own experience The five sections of the book describe the Wise Leader model five mantras that distil the essence of wisdom for leading Each section has a theoretical component theory that the authors seek to bring to life through everyday examples followed by practical ideas and guidance as to what you can next do in service of becoming a wiser more effective leader Each mantra then includes fresh perspectives for leadership development aimed at supporting organisations globally to maximize their considerable investment in this critical area This book is written for leaders at every level of an organization providing a perspective of wise leadership that lends itself to practical application It can also be used by leadership development professionals offering guidance on how to build practical programs to cultivate enhanced levels of wise leadership in your organization Zigzag Michael J. Apter,2018-01-28 The conventional assumption in psychology is that our personalities consist of fixed traits that endure over time The present book takes issue with this over simple idea and suggests something much more interesting and surprising known as Reversal Theory Hard to Be Human Ted Cadsby,2021-10-12 Powerful strategies to combat the design flaws of the human brain that make life in the twenty first century unreasonably difficult If other animals could study us the way we study them they would be puzzled by our unique ability to inflict misery on ourselves We expend a lot of energy replaying past anguish anticipating future distress and stewing in self righteous anger Other animals would call us out for being oddly paradoxical creatures who long to be happy but who are the source of their own suffering We worry about things we have no control over We complain about not being understood while casting a critical eye on others We stubbornly defend our beliefs despite contradictory evidence Complicating all of this is our struggle to adapt to a complex world that we created who struggle to adapt to a confusing world that we ourselves created In our defence we haven t yet mastered our neuron packed brains whose incredible complexity evolved over millennia in a very different world than today s The result of this evolutionary journey Five design features that often morph into design flaws in need of fixing Hard to Be Human corrals the best insights from psychology neuroscience physics and philosophy to reveal powerful strategies for the five big battles we each face in the war with our misguided misbehaving selves Tapping into deeply personal stories to ground the concepts in real life Cadsby reveals how we can overcome our design flaws to be smarter happier and better adapted to the complexities of life in the twenty first century Brain Changer David Disalvo,2013-11-12 Let s be honest You ve tried the sticky note inspirations the motivational calendar and the cute but ineffective carpe diem mug yet your attitude hasn t changed It s time to apply cutting edge science to the challenges of daily life While everyone desires self improvement we are

quickly frustrated when trying to implement the contradictory philosophies of self appointed self help gurus Too often their advice is based on anecdote and personal opinion not real research Bestselling author of What Makes Your Brain Happy and Why You Should Do the Opposite David DiSalvo returns with Brain Changer How Harnessing Your Brain s Power to Adapt Can Change Your Life Drawing on the latest research in neuroscience cognitive psychology behavioral economics communications and even marketing DiSalvo replaces self help with science help He demonstrates how the brain s enormous capacity to adapt is the most crucial factor influencing how we feel and act a factor that we can control to change our lives Findings show our brains are fluid and function much like a feedback loop stimulants from both our environment and from within ourselves catalyze changes in the brain s response That response then elicits additional inputs that the brain identifies and analyzes to further tailor its response DiSalvo shows that the greatest internal tool we have to affect the feedback loop is metacognition thinking about thinking Littered with relatable examples and tackling major aspects of our lives including relationships careers physical health and personal development Brain Changer shows you how to harness metacognition to enrich your life

Relationship with the Self Pallavi Srivastava,2024-07-05 This book delves into the various aspects of a person s relationship with their inner selves and the impact this crucial relationship can have on their well being It offers insights tools and practices to understand and nurture this relationship focusing not only on the what but also on the how of it Designed to be a self help guide this book takes readers on an exciting journey into their inner worlds and dives into the various voices within a person Drawing from the fields of psychology coaching and mindfulness the book breaks down complex ideas like acceptance authenticity and selfcompassion into actionable steps The book will be indispensable for readers interested in improving well being and enhancing personal development skills It will also be useful for students and researchers of positive psychology and behavioral psychology and mental health and wellness professionals including therapists counsellors and executive coaches

What Makes Your Brain Happy and Why You Should Do the Opposite David Disalvo,2011-11-15 This book reveals a remarkable paradox what your brain wants is frequently not what your brain needs In fact much of what makes our brains happy leads to errors biases and distortions which make getting out of our own way extremely difficult Author David DiSalvo presents evidence from evolutionary and social psychology cognitive science neurology and even marketing and economics And he interviews many of the top thinkers in psychology and neuroscience today From this research based platform DiSalvo draws out insights that we can use to identify our brains foibles and turn our awareness into edifying action Ultimately he argues the research does not serve up ready made answers but provides us with actionable clues for overcoming the plight of our advanced brains and consequently living more fulfilled lives
