Multimodality Critical Concepts Linguistics Sigrid:

Multimodality Janina Wildfeuer, Jana Pflaeging, John Bateman, Ognjan Seizov, Chiao-I Tseng, 2019-11-18 Multimodality's popularity as a semiotic approach has not resulted in a common voice yet. Its conceptual anchoring as well as its empirical applications often remain localized and disparate and ideas of a theory of multimodality are heterogeneous and uncoordinated. For the field to move ahead it must achieve a more mature status of reflection, mutual support and interaction with regard to both past and future directions. The red thread across the disciplines reflected in this book is a common goal of capturing the mechanisms of synergetic knowledge construction and transmission using diverse forms of expressions in multimodality. The collection of chapters brought together in the book reflects both a diversity of disciplines and common interests and challenges thereby establishing an excellent roadmap for the future. The contributions revisit and redefine theoretical concepts or empirical analyses which are crucial to the study of multimodality from various perspectives with a view towards evolving issues of multimodal analysis. With this the book aims at repositioning the field as a well grounded scientific discipline with significant implications for future communication research in many fields of study.

Multimodality Sigrid Norris, 2015-12-17 This new four volume collection from Routledge will showcase the major achievements in multimodality through the inclusion of theoretically, methodologically and practically important articles.

Empirical Multimodality Research Jana Pflaeging, Janina Wildfeuer, John A. Bateman, 2021-11-08 This volume advances the data based study of multimodal artefacts and performances by showcasing methods and results from the latest endeavors in empirical multimodal research representing a vibrant international and interdisciplinary research community. The collated chapters identify and seek to inspire novel mixed method approaches to investigate meaning making mechanisms in current communicative artifacts, designs and contexts while attending to their immersive aesthetic and ideological dimensions. Each contribution details innovative aspects of empirical multimodality research offering insights into challenges evolving from quantitative approaches, particular corpus work, results from eye tracking and psychological experiments and analyses of dynamic interactive experiences. The approaches and results presented foreground the inherent multidisciplinary nature and implications of multimodality, renegotiating concepts across linguistics, media studies, social semiotics, game studies and design. With this the volume will inform both current and future developments in theory, methods and transdisciplinary contexts and become a landmark reference for anyone interested in the empirical study of multimodality. **Multimodal**

Theory and Methodology Sigrid Norris, 2020-02-18 This concise guide outlines core theoretical and methodological developments of the growing field of Multimodal Interaction Analysis. The volume unpacks the foundational relationship between multimodality and language and the key concepts which underpin the analysis of multimodal action and interaction and the study of multimodal identity. A focused overview of each concept charts its historical development, reviews the essential literature and outlines its underlying theoretical frameworks and how it links to analytical tools. Norris illustrates

the concept in practice via the inclusion of examples and an image based transcript table or graph The book provides a succinct overview of the latest research developments in the field of Multimodal Interaction Analysis for early career scholars in the field as well as established researchers looking to stay up to date on core developments and learn more about a complementary approach to systemic functional and social semiotic frameworks

Resonanz - Rhythmus - Synchronisierung Thiemo Breyer, Michael B. Buchholz, Andreas Hamburger, Stefan Pfänder, Elke Schumann, 2017-07-15 Der Begriff der Resonanz ursprünglich eine akustische Metapher wird derzeit vielfach verwendet um sprachliche und leibliche aber auch psychologische und physikalische Prozesse zu beschreiben Es geht um die Bedingungen dafür dass etwas oder jemand in

Schwingung versetzt wird und darum welche Resonanzkopplungen durch solches Mitschwingen in Interaktionssystemen erzeugt werden letztlich wie zwei Systeme einen gemeinsamen Rhythmus finden und sich synchronisieren. Die Beiträge des Bandes fragen, wie können Synchronisierungen und Desynchronisierungen sowie ihre Rhythmen wissenschaftlich erfasst werden. Resonanz erweist sich dabei als Konzept mit großer integrativer Kraft sowohl zwischen den Forschungsrichtungen als auch zwischen Theorie und alltäglicher therapeutischer und künstlerischer Praxis.

Multimodality in English Language Learning Sophia Diamantopoulou, Sigrid Ørevik, 2021-12-30 This edited volume provides research based knowledge on the use, production and assessment of multimodal texts in the teaching and learning of English as an Additional Language (EAL). The book reflects growing interest in research on EAL with increasing numbers of learners of English worldwide and the growing relevance of EAL to numerous education systems. The volume examines different aspects of English from a multimodal perspective showcasing empirical research from across five continents and all three levels of education. Applying frameworks based on Multimodal Social Semiotics and Systemic Functional Linguistics, chapters focus on the use and affordances of multimodal texts in pedagogy, literature, culture, text production, assessment and curriculum development connected to EAL. Directing attention to the significance of modes beyond speech and writing in EAL, the volume provides a wide range of perspectives and experiences that can be applied more widely and inspire other practices in the global and diverse field of EAL teaching, learning and assessment. This collection will be of interest to scholars in multimodality, language education and teacher education.

Advancing Multimodal and Critical Discourse Studies Sumin Zhao, Emilia Djonov, Anders Björkvall, Morten Boeriis, 2017-09-08 As a founder and leading figure in multimodality and social semiotics, Theo van Leeuwen has made significant contributions to a variety of research fields including discourse analysis, sociolinguistics, communication and media studies, education and design. In celebration of his illustrious research career, this volume brings together a group of leading and emerging scholars in these fields to review, explore and advance two central research agendas set out by van Leeuwen: the categorisation of the meaning potential of various semiotic resources and the examination of their uses in different forms of communication and the critical analysis of the interaction between semiotic forms, norms and technology in discursive practices. Through 11 cutting edge research papers and an experimental visual essay, the book investigates a broad range of semiotic resources including touch, sound, image, texture and discursive practices such as community, currency, fitness regime, film scoring and commodity upcycling. The book showcases how social semiotics and multimodality can provide insights into the burning issues of the day such as global neoliberalism, terrorism, consumerism and immigration.
