Multiparameter Eigenvalue Problems F.V. Atkinson, Angelo B. Mingarelli, 2010-12-07 One of the masters in the differential equations community the late F V Atkinson contributed seminal research to multiparameter spectral theory and Sturm Liouville theory His ideas and techniques have long inspired researchers and continue to stimulate discussion With the help of co author Angelo B Mingarelli **Multiparameter Eigenvalue Problem** **Multiparameter Eigenvalue Problems** F.V. Atkinson, Angelo B. Mingarelli, 2010-12-07 One of the masters in the differential equations community the late F V Atkinson contributed seminal research to multiparameter spectral theory and Sturm Liouville theory His ideas and techniques have long inspired researchers and continue to stimulate discussion With the help of co author Angelo B Mingarelli **Multiparameter Eigenvalue Problem** **Sturm-Liouville Theory** Anton Zettl, 2005 In 1836 1837 Sturm and Liouville published a series of papers on second order linear ordinary differential operators which started the subject now known as the Sturm Liouville problem In 1910 Hermann Weyl published an article which started the study of singular Sturm Liouville problems Since then the Sturm Liouville theory remains an intensely active field of research with many applications in mathematics and mathematical physics The purpose of the present book is a to provide a modern survey of some of the basic properties of Sturm Liouville theory and b to bring the reader to the forefront of knowledge about some aspects of this theory To use the book only a basic knowledge of advanced calculus and a rudimentary knowledge of Lebesgue integration and operator theory are assumed An extensive list of references and examples is provided and numerous open problems are given The list of examples includes those classical equations and functions associated with the names of Bessel Fourier Heun Ince Jacobi Jorgens Latzko Legendre Littlewood McLeod Mathieu Meissner Morse as well as examples associated with the harmonic oscillator and the hydrogen atom Many special functions of applied mathematics and mathematical physics occur in these examples *Multiparameter eigenvalue problems* Atkinson, 1972-06-16 **Multiparameter eigenvalue problems**

Multiparameter Eigenvalue Problems and Expansion Theorems Hans Volkmer, 2006-11-14 This book provides a self contained treatment of two of the main problems of multiparameter spectral theory the existence of eigenvalues and the expansion in series of eigenfunctions The results are first obtained in abstract Hilbert spaces and then applied to integral operators and differential operators Special attention is paid to various definiteness conditions which can be imposed on multiparameter eigenvalue problems The reader is not assumed to be familiar with multiparameter spectral theory but should have some knowledge of functional analysis in particular of Brower s degree of maps **Convolution-like**

Structures, Differential Operators and Diffusion Processes Rúben Sousa, Manuel Guerra, Semyon

Yakubovich, 2022-07-27 This book provides an introduction to recent developments in the theory of generalized harmonic analysis and its applications It is well known that convolutions differential operators and diffusion processes are interconnected the ordinary convolution commutes with the Laplacian and the law of Brownian motion has a convolution

semigroup property with respect to the ordinary convolution Seeking to generalize this useful connection and also motivated by its probabilistic applications the book focuses on the following question given a diffusion process X_t on a metric space E can we construct a convolution like operator on the space of probability measures on E with respect to which the law of X_t has the convolution semigroup property A detailed analysis highlights the connection between the construction of convolution like structures and disciplines such as stochastic processes ordinary and partial differential equations spectral theory special functions and integral transforms The book will be valuable for graduate students and researchers interested in the intersections between harmonic analysis probability theory and differential equations

Nonconservative Stability Problems of Modern Physics Oleg N. Kirillov, 2021-03-08 This updated revision gives a complete and topical overview on Nonconservative Stability which is essential for many areas of science and technology ranging from particles trapping in optical tweezers and dynamics of subcellular structures to dissipative and radiative instabilities in fluid mechanics astrophysics and celestial mechanics The author presents relevant mathematical concepts as well as rigorous stability results and numerous classical and contemporary examples from non conservative mechanics and non Hermitian physics New coverage of ponderomotive magnetism experimental detection of Ziegler's destabilization phenomenon and theory of double diffusive instabilities in magnetohydrodynamics

Plasma Science and Technology for Emerging Economies Rajdeep Singh Rawat, 2017-10-07 This book highlights plasma science and technology related research and development work at institutes and universities networked through Asian African Association for Plasma Training AAAPT which was established in 1988 The AAAPT with 52 member institutes in 24 countries promotes the initiation and intensification of plasma research and development through cooperation and technology sharing With 13 chapters on fusion relevant laboratory and industrial plasmas for wide range of applications and basic research and a chapter on AAAPT network it demonstrates how with collaborations high quality industrially relevant academic and scientific research on fusion industrial and laboratory plasmas and plasma diagnostics can be successfully pursued in small research labs These plasma sciences and technologies include pioneering breakthroughs and applications in i fusion relevant research in the quest for long term clean energy source development using high temperature high density plasmas and ii multibillion dollar low temperature non equilibrium and thermal industrial plasmas used in processing synthesis and electronics

Spectral Theory & Computational Methods of Sturm-Liouville Problems Don Hinton, 2021-02-27 Presenting the proceedings of the conference on Sturm Liouville problems held in conjunction with the 26th Barrett Memorial Lecture Series at the University of Tennessee Knoxville this text covers both qualitative and computational theory of Sturm Liouville problems It surveys questions in the field as well as describing applications and concepts
