Mathematical Techniques in Multisensor Data Fusion David Lee Hall, Sonya A. H. McMullen, 2004 Since the publication of the first edition of this book advances in algorithms logic and software tools have transformed the field of data fusion The latest edition covers these areas as well as smart agents human computer interaction cognitive aides to analysis and data system fusion control data fusion system this book guides you through the process of determining the trade offs among competing data fusion algorithms selecting commercial off the shelf COTS tools and understanding when data fusion improves systems processing Completely new chapters in this second edition explain data fusion system control DARPA s recently developed TRIP model and the latest applications of data fusion in data warehousing and medical equipment as well as defence systems

Target Acquisition in Communication Electronic Warfare Systems Richard Poisel, 2003-12-01 Radio communications plays an increasingly critical and growing role in today s electronic battlefield Because more and more radio signals are deployed in electronic warfare EW situations determining which ones are friendly and which are enemy has become more difficult and crucial This book arms defense systems designers and operators with the full array of traditional search mechanisms and advanced high resolution techniques for targeting radio signals deployed in electronic warfare An invaluable technical reference the book helps professionals fully understand the tradeoffs involved in designing EW target acquisition systems with less time and effort Moreover practitioners learn how to establish optimum methods for acquiring communication targets for exploitation or countermeasures The book also serves as an excellent text for graduate courses in electronic warfare

Data Fusion for Situation Monitoring, Incident Detection, Alert and Response Management E. Shahbazian, G. Rogova, P. Valin, 2006-03-02 Data Fusion is an interdisciplinary technology domain This work focuses on the mature phase of data fusion namely the detection and identification classification of phenomena being observed and exploitation of the related methods for Security Related Civil Science and Technology SST applications

Model Driven Engineering Languages and Systems Robert B. France, Jürgen Kazmeier, Ruth Breu, Colin Atkinson, 2012-09-19 This book constitutes the refereed proceedings of the 15th International Conference on Model Driven Engineering Languages and Systems MODELS 2012 held in Innsbruck Austria in September October 2012 The 50 papers presented in this volume were carefully reviewed and selected from a total of 181 submissions They are organized in topical sections named metamodels and domain specific modeling models at runtime model management modeling methods and tools consistency analysis software product lines foundations of modeling static analysis techniques model testing and simulation model transformation model matching tracing and synchronization modeling practices and experience and model analysis

Electronic Warfare Target Location Methods Richard Poisel, 2005 Describing the mathematical development underlying current and classical methods of geolocating electronic systems that are emitting this unique book offers practical guidance in electronic warfare target location Supported with over 620 equations and more than 115 illustrations the book provides you with critical design

information on geolocation algorithms It establishes the fundamentals of existing algorithms as a launch point for further algorithm development You gain an in depth understanding of key target location methods that you can effectively apply to your work in the field

Radar Signal Processing and Adaptive Systems Ramon Nitzberg,1999 A valuable resource for radar engineers and managers of all levels this revised edition provides an introduction to the capabilities and limitations of radar as well as a detailed advanced study of key radar signal processing topics The book explains the concepts and theory of radar signal processing such as resolution ambiguities antennas waveforms the theory of detecting targets in noise and or clutter and tracking using data processing It also presents equations for the determination of maximum radar range in free space and as affected by multipath and the horizon

Radar Electronic Countermeasures System Design Richard J. Wiegand,1991 An introduction for readers with a general technical background to the design and operation of active electronic countermeasure jamming systems intended to negate the effectiveness of radar systems used by the bad guys Presents both technical and practical aspects of the hardware and software needs

Concepts, Models, and Tools for Information Fusion Éloi Bossé,Jean Roy,Steve Wark,2007 In the process of information fusion technology masses of live information are instantaneously integrated to create a coherent and precise picture of a rapidly evolving situation This book brings together an international panel of leading experts that gives a fresh and cohesive perspective on this technology's models methods mathematics and computer systems

Bayesian Multiple Target Tracking Lawrence D. Stone,Carl A. Barlow,Thomas L. Corwin,1999 Get the solutions to your most challenging tracking problems with this up to date resource Using the Bayesian inference framework the book helps you design and develop mathematically sound algorithms for dealing with tracking problems involving multiple targets multiple sensors and multiple platforms The book shows you how non linear Multiple Hypothesis Tracking and the Theory of Unified Tracking are successful methods when multiple target tracking must be performed without contacts or association
