Experiment No. 5

Aim: Write a program to implement of 0/1 knapsack problem using Dynamic programming.

What is the 0/1 Knapsack Problem?

We are given N items where each item has some weight and profit associated with it. We are also given a bag with capacity W, [i.e., the bag can hold at most **W** weight in it]. The target is to put the items into the bag such that the sum of profits associated with them is the maximum possible.

In 0/1 Knapsack Problem,

- As the name suggests, items are indivisible here.
- We can not take the fraction of any item.
- We have to either take an item completely or leave it completely.
- It is solved using dynamic programming approach

Algorithm:

Algorithm Dynamic_knapsack (n, W, w[], v[])

Input: n is total no.of items

W is the capacity of knapsack

w[ ] stores weights of each item

v[] stores values of each item

Output:

Returns total value of selected items for the knapsack.

```
for (i=0 to n) do
{
for (j=0 to W) do
{
table [i,0]=0
table [0,j]=0
}
```
