Museum Materialities Museum Materialities:

Museum Materialities Sandra Dudley, 2013-10-18 This is an innovative interdisciplinary book about objects and people within museums and galleries It addresses fundamental issues of human sensory emotional and aesthetic experience of objects The chapters explore ways and contexts in which things and people mutually interact and raise questions about how objects carry meaning and feeling the distinctions between objects and persons particular qualities of the museum as context for person object engagements and the active and embodied role of the museum visitor Museum Materialities is divided into three sections Objects Engagements and Interpretations and includes a foreword by Susan Pearce and an afterword by Howard Morphy It examines materiality and other perceptual and ontological qualities of objects themselves embodied sensory and cognitive engagements both personal and across a wider audience spread with particular objects or object types in a museum or gallery setting notions of aesthetics affect and wellbeing in museum contexts and creative and innovative artistic and museum practices that seek to illuminate or critique museum objects and interpretations Phenomenological and other approaches to embodied experience in an emphatically material world are current in a number of academic areas most particularly strands of material culture studies within anthropology and cognate disciplines Thus far however there has been no concerted application of this kind of approach to museum collections and interactions with them by museum visitors curators artists and researchers Bringing together essays by scholars and practitioners from a wide disciplinary and international base Museum Materialities seeks to make just such a contribution In so doing it makes a valuable and original addition to the literature of both material culture studies and museum studies

The Thing about Museums Sandra Dudley, Amy Jane Barnes, Jennifer Binnie, Julia Petrov, Jennifer Walklate, 2011-08-26 The Things about Museums constitutes a unique highly diverse collection of essays discussing how objects are constructed in museums the ways in which visitors may directly experience those objects how objects are utilised within particular representational strategies and forms and the challenges and opportunities presented by using objects to communicate difficult and contested matters

Media Materialities Iain A. Taylor, Dr. Oliver Carter, 2023-11-28 Provides new perspectives on the increasingly complex relationships between media forms and formats materiality and meaning Drawing on a range of qualitative methodologies our consideration of the materiality of media is structured around three overarching concepts form the physical qualities of objects and the meanings which extend from them format objects considered in relation to the protocols which govern their use and the meanings and practices which stem from them and ephemeral meaning the ways in which media artefacts are captured transformed and redefined through changing social cultural and technological values Each section includes empirical chapters which provide expansive discussions of perspectives on media and materiality It considers a range of media artefacts such as 8mm film board games maps videogames cassette tapes transistor radios and Twitter amongst others These are punctuated with a number of short takes less formal often personal takes exploring the meanings of media in

context We seek to consider the materialities which emerge across the broad and variegated range of the term s use and to create spaces for conversation and debate about the implications that this plurality of material meanings might have for the study of study of media culture and society

Anatomy Museum Elizabeth Hallam, 2016-06-15 The wild success of the traveling Body Worlds exhibition is testimony to the powerful allure that human bodies can have when opened up for display in gallery spaces But while anatomy museums have shown their visitors much about bodies they themselves are something of an obscure phenomenon with their incredible technological developments and complex uses of visual images and the flesh itself remaining largely under researched This book investigates anatomy museums in Western settings revealing how they have operated in the often passionate pursuit of knowledge that inspires both fascination and fear Elizabeth Hallam explores these museums past and present showing how they display the human body whether naked stripped of skin completely dissected or rendered in the form of drawings three dimensional models x rays or films She identifies within anatomy museums a diverse array of related issues from the representation of deceased bodies in art to the aesthetics of science from body donation to techniques for preserving corpses and ritualized practices for disposing of the dead Probing these matters through in depth study Anatomy Museum unearths a strange and compelling cultural history of the spaces human bodies are made to occupy when displayed after death

The Anatomy Museum Elizabeth Hallam, 2008 Anatomy museums around the world showcase preserved corpses in service of education and medical advancement but they are little known and have been largely hidden from the public eye Elizabeth Hallam here investigates the anatomy museum and how it reveals the fascination and fears that surround the dead body in Western societies Hallam explores the history of these museums and how they operate in the current cultural environment Their regulated access increasingly clashes with evolving public mores toward the exposed body as demonstrated by the international popularity of the Body Worlds exhibition The book examines such related topics as artistic works that employ the images of dead bodies and the larger ongoing debate over the disposal of corpses Issues such as aesthetics and science organ and body donations and the dead body in Western religion and ritual are also discussed here in fascinating depth The Anatomy Museum unearths a strange and compelling cultural history that investigates the ideas of preservation human rituals of death and the spaces that our bodies occupy in this life and beyond

A Museum Studies Approach to Heritage Sheila Watson, Amy Jane Barnes, Katy Bunning, 2018-10-08 Heritage s revival as a respected academic subject has in part resulted from an increased awareness and understanding of indigenous rights and non Western philosophies and practices and a growing respect for the intangible Heritage has thus far focused on management tourism and the traditionally heritage minded disciplines such as archaeology geography and social and cultural theory Widening the scope of international heritage studies A Museum Studies Approach to Heritage explores heritage through new areas of knowledge including emotion and affect the politics of dissent migration and intercultural and participatory dimensions of heritage Drawing on a range of disciplines and the best from established sources the book

includes writing not typically recognised as heritage but which nevertheless makes a valuable contribution to the debate about what heritage is what it can do and how it works and for whom Including heritage perspectives from beyond the professional sphere the book serves as a reminder that heritage is not just an academic concern but a deeply felt and keenly valued public and private practice This blending of traditional topics and emerging trends established theory and concepts from other disciplines offers readers international views of the past and future of this growing field A Museum Studies Approach to Heritage offers a wider more current and more inclusive overview of issues and practices in heritage and its intersection with museums As such the book will be essential reading for postgraduate students of heritage and museum studies It will also be of great interest to academics practitioners and anyone else who is interested in how we conceptualise and use the past

Displaced Things in Museums and Beyond Sandra H. Dudley, 2020-11-29 Displaced Things in Museums and Beyond looks anew at the lives effects and possibilities of things Starting from the perspectives of things themselves it outlines a particular displacement approach to the museum anthropology and material culture The book explores the ways in which the objects are experienced in their present displaced settings and the implications and potentialities they carry It offers insights into matters of difference and the hope that may be offered by transformative encounters between persons and things Drawing on anthropological studies of ritual to conceptualise and examine displacement and its implications and possibilities Dudley develops her arguments through exploration of displaced objects now in museums and dislocated or exiled from their prior geographical historical cultural intellectual and personal contexts The book s approach and conclusions are relevant far beyond the museum showing that even in the most difficult of circumstances there is agency distinction and dignity in the choices and impacts that are made and that things and places as well as people have efficacy and potency in those choices In Displaced Things displacement emerges as fundamental to understanding the lives of things and their relationships with human beings and the places however defined that they make and pass within The book will be essential reading for academics and students engaged in the study of museums heritage anthropology culture and history

Theorizing Archaeological Museum Studies Monika Stobiecka, 2023-06-01 Theorizing Archaeological Museum Studies works towards reconnecting archaeological practice the theoretical richness of archaeology and museum studies The book therefore embraces both the practical aspects of archaeology and empirical studies in museums in order to rethink what happens when an artefact changes into an exhibit This study is positioned at the intersection of both history and archaeological theory and of the history of art and museum studies The central focus of this book explores the relationship between museums and their dominant paradigms on the one hand and new approaches and theories in archaeology on the other It thus also illustrates the co dependencies relations and tensions that characterize the relationship between academia and museums This book demonstrates how in becoming exhibits artefacts have and continue to become reflections of the discipline s prevailing paradigms while manifesting the dominant aims and methods of knowledge production pertaining at a

given time and place as well as the desired social interpretations and modes of presenting the past Theorizing Archaeological Museum Studies offers important insights for academics and students archaeology heritage studies museum studies as well as for practitioners museum employees heritage practitioners The book is also intended for scholars from across the humanities interested in museum studies heritage studies curatorial studies cultural studies cultural geography material culture history of archaeology archaeological theory and the anthropology of things

Uncertain Images: Museums and the Work of Photographs Elizabeth Edwards, Sigrid Lien, 2016-02-17 Almost all museums hold photographs in their collections and museum professionals and their audiences engage with photographs in a myriad of ways Yet despite some three decades of critical museology and photographic theory and an extensive debate on the politics of representation outside art museums almost no critical attention has been given specifically to the roles purposes and lives of these photographs within museums This book brings into focus the ubiquitous yet entirely unconsidered work that photographs are put to in museums The authors argument is that there is an economy of photographs in museums which is integral to the processes of the museum and integral to the understanding of museums The international contributors drawn from curators and academics reflect a range of visual and museological expertise After an introduction setting out the range of questions and problems the first part addresses broad curatorial strategies and ways of thinking about photographs in museums Shifting the emphasis from curatorial practices and anxieties to the space of the gallery this is followed by a series of case studies of exhibitionary practices and the museum strategies that support them The third section focuses on the role of photographs in the museum articulation of difficult histories A final section addresses photograph collections in a digital environment New technologies and new media have transformed the management address and purposing in photographs in museums from cataloguing practices to streaming on social media These growing practices challenge both traditional hierarchies of knowledge in museums and the location of authority about photographs The volume emerges from PhotoCLEC a HERA funded project on museums and the photographic legacy of the colonial past in a postcolonial and multicultural Europe

Museums and Restitution Louise Tythacott, Kostas Arvanitis, 2016-04-22 This book examines contemporary approaches to restitution from the perspective of museums It focuses on the ways in which these institutions have been addressing the subject at a regional national and international level In particular it explores contemporary practices and recent claims and investigates to what extent the question of restitution as an issue of ownership is still at large or whether museums have found additional ways to conceptualise and practice restitution by thinking beyond the issue of ownership The challenges benefits and drawbacks of recent and current museum practice are explored At the same time the book discusses how these museum practices are received and informed by source communities institutional and governmental agendas and visitors expectations in order to explore issues of authority collaboration and shared or conflicting values between the different communities involved in the process This important book will contribute to the developing body of literature that

academics professionals policy makers and students can refer to in order to understand how restitution has been negotiated
