Music in Everyday Life Tia DeNora, 2000-06-08 The power of music to influence mood create scenes routines and occasions is widely recognised and this is reflected in a strand of social theory from Plato to Adorno that portrays music as an influence on character social structure and action There have however been few attempts to specify this power empirically and to provide theoretically grounded accounts of music s structuring properties in everyday experience *Music in Everyday Life* uses a series of ethnographic studies an aerobics class karaoke evenings music therapy sessions and the use of background music in the retail sector as well as in depth interviews to show how music is a constitutive feature of human agency Drawing together concepts from psychology sociology and socio linguistics it develops a theory of music s active role in the construction of personal and social life and highlights the aesthetic dimension of social order and organisation in late modern societies

Music Making Community Tony Perman, Stefan Fiol, 2024-05-21 Making music offers enormous possibilities and faces significant limitations in its power to generate belonging and advance social justice Tony Perman and Stefan Fiol edit essays focused on the forms of interplay between music making and community making as mutually creative processes Contributors in the first section look at cases where music arrived in settings with little or no sense of community and formed social bonds that lasted beyond its departure In the sections that follow the essayists turn to stable communities that used musical forms to address social needs and both forged new social groups and in some cases splintered established communities By centering the value of difference in productive feedback dynamics of music and community while asserting the need for mutual moral indebtedness they foreground music s potential to transform community for the better Contributors Stephen Blum Joanna Bosse Sylvia Bruinders Donna A Buchanan Rick Deja Veit Erlmann Stefan Fiol Eduardo Herrera David A McDonald Tony Perman Thomas Solomon and Ioannis Tsekouras

Bourdieu and the Sociology of Music Education Pamela Burnard, Ylva Hofvander Trulsson, 2016-04-15 Pierre Bourdieu has been an extraordinarily influential figure in the sociology of music For over four decades his concepts have helped to generate both empirical and theoretical interventions in the field of musical study His impact on the sociology of music taste in particular has been profound his ideas directly informing our understandings of how musical preferences reflect and reproduce inequalities between social classes ethnic groups and men and women *Bourdieu and the Sociology of Music Education* draws together a group of international researchers academics and artist practitioners who offer a critical introduction and exploration of Pierre Bourdieu s rich

generative conceptual tools for advancing sociological views of music education By employing perspectives from Bourdieu's work on distinction and judgement and his conceptualisation of fields, habitus and capitals in relation to music education contributing authors explore the ways in which Bourdieu's work can be applied to music education as a means of linking school institutional habitus and learning and curriculum and family class habitus The volume includes research perspectives and studies of how Bourdieu's tools have been applied in industry and educational contexts including the primary secondary and higher music education sectors The volume begins with an introduction to Bourdieu's contribution to theory and methodology and then goes on to deal in detail with illustrative substantive studies The concluding chapter is an extended essay that reflects on and critiques the application of Bourdieu's work and examines the ways in which the studies contained in the volume advance understanding The book contributes new perspectives to our understanding of Bourdieu's tools across diverse settings and practices of music education

The Oxford Handbook of Social Media and Music Learning Janice L. Waldron, Stephanie Horsley, Kari K. Veblen, 2020-09-23 The rapid pace of technological change over the last decade particularly the rise of social media has deeply affected the ways in which we interact as individuals in groups and among institutions to the point that it is difficult to grasp what it would be like to lose access to this everyday aspect of modern life The Oxford Handbook of Social Media and Music Learning investigates the ways in which social media is now firmly engrained in all aspects of music education providing fascinating insights into the ways in which social media musical participation and musical learning are increasingly entwined In five sections of newly commissioned chapters a refreshing mix of junior and senior scholars tackle questions concerning the potential for formal and informal musical learning in a networked society Beginning with an overview of community identity and the new musical self through social media scholars explore intersections between digital musical and social constructs including the vernacular of born digital performance musical identity and projection and the expanding definition of musical empowerment The fifth section brings this handbook to full practical fruition featuring firsthand

accounts of digital musicians students and teachers in the field The Oxford Handbook of Social Media and Music Learning opens up an international discussion of what it means to be a musical community member in an age of technologically mediated relationships that break down the limits of geographical cultural political and economic place

The Sociology of Wind Bands Vincent Dubois, Jean-Matthieu Méon, translated by Jean-Yves Bart, 2016-03-03 Despite the musical and social roles they play in many parts of the world wind bands have not attracted much interest from sociologists The Sociology of Wind Bands seeks to fill this gap in research by providing a sociological account of this musical universe as it stands now Based on a qualitative and quantitative survey conducted in northeastern France the authors present a vivid description of the orchestras the backgrounds and practices of their musicians and the repertoires they play Their multi level analysis ranging from the cultural field to the wind music subfield and to everyday life relationships within bands and local communities sheds new light on the social organisation meanings and functions of a type of music that is all too often taken for granted Yet they go further than merely portraying a musical genre As wind music is routinely neglected and socially defined in terms of its poor musical quality or even bad taste the book addresses the thorny issue of the effects of cultural hierarchy and domination It proposes an imaginative and balanced framework which beyond the specific case of wind music is an innovative contribution to the sociology of lowbrow culture

Handbook of Musical Identities Raymond A. R. MacDonald, David John Hargreaves, Dorothy Miell, 2017 The Handbook of Musical Identities explores three features of psychological approaches to musical identities and four real life contexts in which musical identities have been investigated The multidisciplinary breadth of the Handbook reflects the changes that are taking place in music in digital technology and in their role in society
