Principia Mathematica To 56 An Abridged Text Of Vol 1 Only:

The Infinite in Mathematics Felix Kaufmann, 2012-12-06 The main item in the present volume was published in 1930 under the title *Das Unendliche in der Mathematik und seine Ausschaltung* It was at that time the fullest systematic account from the standpoint of Husserl's phenomenology of what is known as finitism also as intuitionism and constructivism in mathematics Since then important changes have been required in philosophies of mathematics in part because of Kurt Godel's epoch making paper of 1931 which established the essential incompleteness of arithmetic In the light of that finding a number of the claims made in the book and in the accompanying articles are demonstrably mistaken Nevertheless as a whole it retains much of its original interest and value It presents the issues in the foundations of mathematics that were under debate when it was written and in some cases still are and it offers one alternative to the currently dominant set theoretical definitions of the cardinal numbers and other arithmetical concepts While still a student at the University of Vienna Felix Kaufmann was greatly impressed by the early philosophical writings especially by the *Logische Untersuchungen* of Edmund Husserl He was never an uncritical disciple of Husserl and he integrated into his mature philosophy ideas from a wide assortment of intellectual sources But he thought of himself as a phenomenologist and made frequent use in all his major publications of many of Husserl's logical and epistemological theses

Principia Mathematica to *56 Alfred North Whitehead, Bertrand Russell, 1970 *Antiquarian Bookman*, 1963

A Bibliography of Bertrand Russell Kenneth Blackwell, Harry Ruja, Sheila Turcon, 2003-09-02 From 1895 the year he published his first signed article to four days before his death in 1970 when he wrote his last Bertrand Russell was a powerful force in the world of mathematics philosophy human rights and the struggle for peace During those years he published 70 books almost as many pamphlets and over 2 000 articles he also contributed pieces to some 200 books The availability of the Bertrand Russell Archives at McMaster University since 1968 has made it possible for the first time to compile a full descriptive bibliography of his writings The Collected Papers are based on it Fully annotated the Bibliography is textually oriented and will guide the scholar collector and general reader to the authoritative editions of Russell's works It includes references to the locations of all known speeches and interviews and reproductions of the dust jackets of Russell's books Blackwell Ruja and Turcon have cooperated for nearly 20 years on the new Bibliography Lord Russell saw the extensive additions for it near the end of his life and declared I am impressed

The long and short of mental time travel-- self-projection

over time-scales large and small James M. Broadway, Claire M. Zedelius, Jonathan W. Schooler, Simon Grondin, 2015-07-02

Researchers working in many fields of psychology and neuroscience are interested in the temporal structure of experience as well as the experience of time at scales of a few milliseconds up to a few seconds as well as days months years and beyond This Research Topic supposes that broadly speaking the field of time psychology can be organized by distinguishing between perceptual and conceptual time scales Dealing with conceptual time mental time travel also called mental simulation self projection episodic semantic memory prospection foresight allows humans and perhaps other animals to imagine and plan events and experiences in their personal futures based in large part on memories of their personal pasts as well as general knowledge Moreover contents of human language and thought are fundamentally organized by a temporal dimension enmeshed with it so thoroughly that it is usually expressible only through spatial metaphors But what might such notions have to do with experienced durations of events lasting milliseconds up to a few seconds during the so called present moment of perception action cycle time This Research Topic is organized around the general premise that by considering how mental time travel might scale down to time perception and vice versa no less progress and integrative synthesis within and across scientific domains might be facilitated Bipolar configurations of future and past orientations of the self may be repeated in parallel across conceptual and perceptual time scales subsumed by a general Janus like feedforward feedback system for goal pursuit As an example it is notable that the duality of prospection and semantic episodic memory operating at conceptual time scales has an analogue in perception action cycle time namely the interplay of anticipatory attention and working memory Authors from all areas of psychology and neuroscience are encouraged to submit articles of any format accepted by the journal Original Research Methods Hypothesis Theory Reviews etc which might speak to questions about time and temporal phenomena at long and or short time scales
