Tales from the Road Neil Zurcher, 2010 Neil Zurcher deftly observes things most of us would overlook and that is what makes his stories so enticing Robin Swoboda Neil's writing skills wry wit and calm warm demeanor allowed him to move effortlessly from award winning hard news reporter to Cleveland's king of travel Tim Taylor He met Prince Charles in a bathroom and tripped and fell on President Gerald Ford He raced on an elephant piloted a glider and hung from a trapeze He survived a hotel fire a tornado and countless stunts for the camera As a news reporter and host of the long running One Tank Trips travel segment on Channel 8 in Cleveland Neil visited every corner of Ohio and beyond met hundreds of unusual people and took part in history making events He was tear gassed at an anti war protest and almost trapped inside the Ohio Penitentiary during a riot He drove in a day long high speed police chase from Cleveland to Kentucky and got lost in the middle of Lake Erie He rode in jet boats jet fighters sternwheelers a World War II tank and almost every other kind of vehicle imaginable most frequently his trademark red and white 1959 Nash Metropolitan He was ordained as a minister in the Free Spirit Association Church and even officiated at a few weddings He would do almost anything and go almost anywhere for a good story And in the process he became one of the most popular personalities on Cleveland TV In this book with his familiar folksy style Neil shares dozens of his favorite personal stories from a lifetime in Cleveland television Many will cause a chuckle some will surprise and all recall an era of television and of Northeast Ohio that was full of color and characters

Automobile Suspensions Colin Campbell, 2012-12-06 This book is an introduction to the elementary technology of automobile suspensions Inevitably steering geometry must be included in the text since the dynamic steering behaviour road holding and cornering behaviour are all influenced by the suspension design Steering mechanisms and

steering components are not covered in this book This is not a mathematical treatise but only a fool or a genius would attempt to design a motor vehicle without mathematics The mathematics used in this book should present no problem to a first year university student SI units have been used in general but for the benefit of those not familiar with them we have included in brackets in many cases the equivalent values in Imperial units Many engineers regard the Pascal as an impractical unit of pressure The author has therefore expressed pressures in bars 1 bar 105Pa A deviation from SI units is the use of degrees and minutes instead of radians to express camber castor roll angles etc This is still common practice in the motor industry No attempt has been made to make any stress calculations on suspension components The automobile engineering student will have access to other textbooks on such subjects as strength of materials and theory of structures
