SAP Backup using Tivoli Storage Manager Budi Darmawan,Miroslav Dvorak,Dhruv Harnal,Gerson Makino,Markus Molnar,Rennad Murugan,Marcos

Silva, IBM Redbooks, 2013-04-26 In this IBM Redbooks publication we give an overview of different data management topics related to a typical SAP data center. The intrinsic functionality of SAP is not designed to completely handle all the tasks of a data center by itself but the SAP system offers several interface possibilities to attach external tools to it to accomplish this task. We explain SAP basic concepts and the issues with SAP data management. We introduce Tivoli Storage Manager and all of its products that are related to SAP data management. We provide some comparison between database backup and recovery tools. Finally we discuss data archiving using IBM DB2 CommonStore for SAP and discuss high availability requirements and disaster recovery considerations. The second part of this book discusses a practical implementation of SAP backup and recovery with Tivoli Storage Manager. We implement this setup on two separate SAP systems one running DB2 and the other running Oracle database. We also implement LAN free backup and FlashCopy scenarios. In the sample implementation section we show many different tasks such as backup and restore database recovery backup monitoring and tuning. We also cover some advanced backup availability considerations such as split mirror backup and standby databases. This book helps individuals that operate an SAP environment to devise a strategy for a sound and comprehensive data backup solution using the IBM Tivoli Storage Management product family. *SAP Security Configuration and Deployment* Joey

Hirao, 2008-11-18 Throughout the world high profile large organizations aerospace and defense automotive banking chemicals financial service providers healthcare high tech insurance oil and gas pharmaceuticals retail telecommunications and utilities and governments are using SAP software to process their most mission critical highly sensitive data. With more than 100 000 installations SAP is the world's largest enterprise software company and the world's third largest independent software supplier overall. Despite this widespread use there have been very few books written on SAP implementation and security despite a great deal of interest. There are 220 000 members in an on line SAP community seeking information ideas and tools on the IT Toolbox Website alone. Managing SAP user authentication and authorizations is becoming more complex than ever as there are more and more SAP products involved that have very different access issues. It's a complex area that requires focused expertise. This book is designed for these network and systems administrator who deal with the complexity of having to make judgmental decisions regarding enormously complicated and technical data in the SAP landscape as well as pay attention to new compliance rules and security regulations. Most SAP users experience significant challenges when trying to manage and mitigate the risks in existing or new security solutions and usually end up facing repetitive expensive rework and perpetuated compliance challenges. This book is designed to help them properly and efficiently manage these challenges on an ongoing basis. It aims to remove the Black Box mystique that surrounds SAP security. The most comprehensive coverage of the essentials of SAP security currently available risk and control management identity and access management data protection and privacy corporate governance legal and regulatory compliance. This book contains information about SAP security that is not available anywhere else to help the reader avoid the gotchas that may leave them
