Guide for Doctors and Sonographers Studying for Echocardiography Board and Registry Certifications We want you to pass
your exam It is that simple Together the editors have spent more than 45 years studying echocardiography We have six
degrees eight national certificates have read more than 25 000 exams and have acquired more than 18 000 studies We
readily admit that we love this stuff We are less than enamored however with becoming board certified and trying to pass the
registry exams both of which have become required in recent years to practice We ourselves have struggled to overcome the
board and registry exams We have watched our colleagues and even our superiors struggle to achieve board certification We
thought therefore that we might be able to condense some of what we learned in our journeys in a way that would help
people study for these rather painful tests hence the motivation for this book We hope the text presented provides useful
material for anyone who wants to learn more about echocardiography We are especially interested in helping fellows in
cardiology attending cardiologists cardiac radiologists intensivists sonographers and cardiovascular technologists do well on

their board and registry exams which are notoriously difficult and stressful even for the best of students For all questions we have made every effort to assure accuracy answers have been verified against two separate independent sources and all information has been carefully studied The Cumulative Book Index ,1995 A world list of books in the English language
