NATURALISM DEFEATED?

ESSAYS ON PLANTINGA'S
EVOLUTIONARY ARGUMENT
AGAINST NATURALISM

Naturalism Defeated

James Beilby

Naturalism Defeated:

Naturalism Defeated? James K. Beilby, 2002 Plantinga's argument is aimed at metaphysical naturalism or roughly the view that no supernatural beings exist. Naturalism is typically conjoined with evolution as an explanation of the existence and diversity of life. Plantinga's claim is that one who holds to the truth of both naturalism and evolution is irrational in doing so. More specifically, because the probability that unguided evolution would have produced reliable cognitive faculties is either low or inscrutable, one who holds both naturalism and evolution acquires a defeater for every belief he/she holds, including the beliefs associated with naturalism and evolution. *The Evolutionary Argument against Naturalism* Jim

Slagle, 2021-06-17 Contemporary discussions in metaphysics, epistemology, and philosophy of mind are dominated by the presupposition of naturalism. Arguing against this established convention, Jim Slagle offers a thorough defence of Alvin Plantinga's Evolutionary Argument against Naturalism (EAAN) and, in doing so, reveals how it shows that evolution and naturalism are incompatible. Charting the development of Plantinga's argument, Slagle asserts that the probability of our cognitive faculties reliably producing true beliefs is low if ontological naturalism is true and therefore all other beliefs produced by these faculties, including naturalism itself, are self-defeating. He critiques other well-known epistemological approaches, including those of Descartes and Quine, and deftly counters the many objections against the EAAN to conclude that metaphysical naturalism should be rejected on the grounds of self-defeat. By situating Plantinga's argument within a wider context and showing that science and evolution cannot entail naturalism, Slagle renders this most common metaphysical view irrational. As such, the book advocates an important reconsideration of contemporary thought at the intersection of philosophy, science, and religion. *The Nature and Normativity of Defeat* Christoph Kelp, 2023-09-04 Defeat is the loss of justification for believing something in light of new information. This Element mainly aims to work towards developing a novel account of defeat. It distinguishes among three broad views in the epistemology of defeat: scepticism, internalism, and externalism, and argues that sceptical and internalist accounts of defeat are bound to remain unsatisfactory. As a result, any viable account of defeat must be externalist. While there is no shortage of externalist accounts, the Element provides reason to think that extant accounts remain unsatisfactory. The Element also explains the constructive tasks of developing an alternative account of defeat and showing that it improves on the competition. **Warranted**

Christian Belief Alvin Plantinga, 2000-01-27 This is the third volume in Alvin Plantinga's trilogy on the notion of warrant, which he defines as that which distinguishes knowledge from true belief. In this volume, Plantinga examines warrant's role in theistic belief, tackling the questions of whether it is rational, reasonable, justifiable, and warranted to accept Christian belief, and whether there is something epistemically unacceptable in doing so. He contends that Christian beliefs are warranted to the extent that they are formed by properly functioning cognitive faculties; thus, insofar as they are warranted, Christian beliefs are knowledge if they are true. Reasons, Justification, and Defeat Jessica Brown, Mona Simion, 2021 This volume is

about the notion of defeat in philosophy The idea is that someone who has some knowledge or a justified belief can lose this knowledge or justified belief if they acquire a defeater evidence that undermines it The contributors examine the role of defeat not just in epistemology but in practical reasoning and ethics *Evidence and Religious Belief* Kelly James Clark,Raymond J. VanArragon,2011-07-28 A fundamental question in philosophy of religion is whether religious belief must be based on evidence in order to be properly held In recent years two prominent positions on this issue have been staked out evidentialism which claims that proper religious belief requires evidence and Reformed epistemology which claims that it does not Evidence and Religious Belief contains eleven chapters by prominent philosophers which push the discussion in new directions The volume has three parts The first part explores the demand for evidence some chapters object to it while others seek to restate it or find space for compromise between Reformed epistemology and evidentialism The second part explores ways in which beliefs are related to evidence that is ways in which the evidence for or against religious belief that is available to a person can depend on that person's background beliefs and other circumstances The third part contains chapters that discuss actual evidence for and against religious belief Evidence for belief in God includes the so called common consent of the human race and the way that such belief makes sense of the moral life evidence against it includes profound puzzles about divine freedom which suggest that it is impossible for a being to be morally perfect *Dictionary of Christianity and Science* Zondervan,2017-04-25 The definitive reference work on science and Christian belief How does Christian theology relate to scientific inquiry What are the competing philosophies of science and do they work with a Christian faith based on the Bible No reference work has covered this terrain sufficiently until now Featuring entries from over 140 international contributors the Dictionary of Christianity and Science is a deeply researched peer reviewed fair minded work that illuminates the intersection of science and Christian belief In one volume you get reliable summaries and critical analyses of over 450 relevant concepts theories terms movements individuals and debates You will find answers to your toughest questions about faith and science from the existence of Adam and Eve to the age of the earth evolution and string theory FEATURES INCLUDE Over 450 entries that will help you think through some of today's most challenging scientific topics including climate change evolution bioethics and much more Essays from over 140 leading international scholars including Francis Beckwith Michael Behe Darrell Bock William Lane Craig Hugh Ross Craig Keener Davis Young John Walton and many more Multiple view essays on controversial topics allow you to understand and compare differing Christian viewpoints Learn about flesh and blood figures who have shaped the interaction of science and religion Augustine Aquinas Bacon Darwin and Stephen Hawking are just the beginning Fully cross referenced entries include references and recommendations for further reading Advance Praise Every Christian studying science will want a copy within arm's reach Scot McKnight Northern Seminary This is an invaluable resource that belongs in every Christian's library I will be keeping my copy close by when I'm writing Lee Strobel Elizabeth and John Gibson chair of apologetics Houston Baptist University Sparkles with

the development of Plantinga's religious epistemology before considering Plantinga's mature religious epistemology in detail. Locating Plantinga's most recent work in the context of his theological assumptions, his previous work on religious epistemology, and in the context of the current debate over how knowledge should be characterized, Beilby blends theological and philosophical discussion to offer a unique perspective on Plantinga's influential proposal.
