Nature Study Hundred Lessons Plants:

Nature Study One Hundred Lessons about Plants (Classic Reprint) David Worth Dennis, 2017-04-12 Excerpt from Nature Study One Hundred Lessons About Plants Nature Study is new Liebig was the first man who used a laboratory for instruction He began his career as a teacher in 1824 Courses in mathematics and language have had centuries in which to perfect their methods of instruction and the lessons it is best to offer for this reason lessons in these subjects are good if not the best that can be offered and the methods of giving them have had opportunity to eliminate errors The teacher of nature study has almost no past to guide him The older teachers of nature study were not themselves taught in schools As a department of instruction it is without traditions or precedents Every serious teacher so far has had to pave his own road All teachers have gone different roads It could not be otherwise The material with which nature study deals is inexhaustible no one can ever be acquainted with more than an insignificant fraction of it It is all good It will always be the case that successful teachers will give what they know They will accordingly teach different things It is probably true that every successful teacher has from year to year taken his pupils over different ground and that everything done has proved to be good What it is best to teach we cannot yet tell in other words than that that material is best which can be had This nature study work has passed through three phases It was first taught from books The only nature study work I ever did in school was in Geography and Physiology and every syllable of these came from books We next added the laboratory How new this phase of the subject is may be learned from the presidential address of Dr Wiley before the Indiana Science Teachers Association at Lafayette in 1895 He says Prior to 1863 no laboratory instruction was given in Indiana except a little in qualitative analysis About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at www.forgottenbooks.com This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works
