Rethinking the Concept of Law of Nature Yemima Ben-Menahem, 2022-06-13 This book subjects the traditional concept of law of nature to critical examination There are two kinds of reasons that invite this reexamination one deriving from philosophical concerns over the traditional concept the other motivated by theoretical and practical changes in science One of the philosophical worries is that the idiom of law of nature especially when combined with the notion of laws governing individual events and processes is no longer as intelligible as it used to be in the theistic context in which the formulation of laws became central to science The traditional concept is also challenged in various ways by contemporary scientific theories such as quantum mechanics chaos theory and the general theory of relativity It is no longer clear that there are any universal laws laws do not always guarantee predictability and the border between physical and mathematical considerations is constantly shifting The most difficult challenge perhaps is to come up with a scientific explanation of the origin of laws Wrestling with these intriguing problems the papers in this volume broaden both our understanding of the natural order and our desiderata of scientific explanation *The Natural Environment in Late Byzantine Correspondence* Kalliope Mavrommati, 2025-10-10 This book investigates environmental issues traced through the epistolography of the late Byzantine period which spans roughly the end of the twelfth century to the mid fifteenth century The book's overarching goal is to shed light on the complex ways in which the Byzantines conceptualised their connection to the natural world both in broad strokes and in finer granularity and to provide a general understanding of societal dependence on the environment It offers further details of this relationship by drawing on a wide variety of literary sources as well as archaeological and environmental data *Political Economy, Race, and the Image of Nature in the United States, 1825-1878* Evan Robert Neely, 2024-05-01 *Political Economy Race and the Image of Nature in the United States 1825 1878* is an interdisciplinary work analyzing the historical origins of a dominant concept of Nature in the culture of the United States during the period of its expansion across the continent Chapters analyze the ways in which Nature became a discursive site where theories of race and belonging adaptation and environment and the uses of literary and pictorial representation were being renegotiated forming the basis for an ideal of the human and the nonhuman world that is still with us Through an interdisciplinary approach involving the fields of visual culture political economy histories of racial identity and ecocritical studies the book examines the work of seminal figures in a variety of literary and artistic disciplines and puts the visual culture of the United States at the center of intellectual trends that have enormous implications for contemporary cultural practice The book will be of interest to scholars working in art history visual culture American studies environmental studies ecocriticism critical race theory and semiotics **The Mind in Another Place** Luke Timothy Johnson, 2022-03-22 A witness to the peculiar way of being that is the scholar's Luke Timothy Johnson is one of the best known and most influential New Testament scholars of recent decades In this memoir he draws on his rich experience to invite readers into the scholar's life its aims commitments

and habits In addition to sharing his own story from childhood to retirement Johnson reflects on the nature of scholarship more generally showing how this vocation has changed over the past half century and where it might be going in the future He is as candid and unsparing about negative trends in academia as he is hopeful about the possibilities of steadfast disciplined scholarship In two closing chapters he discusses the essential intellectual and moral virtues of scholarly excellence including curiosity imagination courage discipline persistence detachment and contentment Johnson s robust defense of the scholarly life portrayed throughout this book as a generative process of discovery and disclosure will inspire both new and seasoned scholars as well as anyone who reads and values good scholarship But *The Mind in Another Place* ultimately resonates beyond the walls of the academy and speaks to matters more universally human the love of knowledge and the lifelong pursuit of truth

The Old Believers in Imperial Russia Peter T. De Simone, 2018-06-14 Two Romes have fallen The third stands And there will be no fourth So spoke Russian monk Hegumen Filofei of Pskov in 1510 proclaiming Muscovite Russia as heirs to the legacy of the Roman Empire following the collapse of the Byzantine Empire The so called Third Rome Doctrine spurred the creation of the Russian Orthodox Church although just a century later a further schism occurred with the Old Believers or Old Ritualists challenging Patriarch Nikon s liturgical and ritualistic reforms and laying their own claim to the mantle of Roman legacy While scholars have commonly painted the subsequent history of the Old Believers as one of survival in the face of persistent persecution at the hands of both tsarist and church authorities Peter De Simone here offers a more nuanced picture Based on research into extensive yet mostly unknown archival materials in Moscow he shows the Old Believers as versatile and opportunistic and demonstrates that they actively engaged with and even challenged the very notion of the spiritual and ideological place of Moscow in Imperial Russia Ranging in scope from Peter the Great to Lenin this book will be of use to all scholars of Russian and Orthodox Church history **Paul Henri**

Thiry d'Holbach's and Richard Dawkins's Comprehensive Scientism Gerold Reisinger , 2022-10-12 Science unbound In this book the author explores Comprehensive Scientism by juxtaposing the philosophies of one challenging figure of the European Enlightenment with those of a legendary evolutionary biologist Paul Henri Thiry d Holbach lived from 1723 1789 and wrote one monumental work known as the Bible of atheists Richard Dawkins a modern day scientist and self declared atheist is currently galvanizing the secularist movement Gerold Reisinger s treatise aims to uncover the motives of d Holbach and Dawkins for claiming that science is the only source of knowledge to defend atheism Various aspects of their forms of scientism are outlined and elucidated in relation to the comprehensive form that combines epistemological ontological moral and existential scientism Basic research by Stenmark and Peels frames this philosophical work s analysis and comparison of the two iconic philosophers and their writings The book shows that scientism is what unites their positions and proves to be as powerful a motive today as it was in the 18th century to render science the know all and be all of truth and reality and thereby attempt to obviate religion for humankind **The Aesthetics of Discipleship** Adrian Coates, 2021-09-30

Discipleship is embodied Formation in the Christian life is not an otherworldly exercise but one that plays out in this world interwoven with everyday sensory experience in ordinary life The Aesthetics of Discipleship explores this dynamic through Kierkegaard s framing of aesthetic existence the sensory experience of being in the moment further developed by Bonhoeffer as operating within a realm of freedom encompassing not only art but play friendship and cultural formation In addition to Kierkegaard and Bonhoeffer the work of Iain McGilchrist Graham Ward and Nicholas Wolterstorff is employed to offer a fresh perspective on discipleship from below Everyday sensory experiences are integral not only to being human but to the practice of discipleship such that discipleship integrates aesthetic ethical and religious existence Aesthetic existence unhinged from a life of faith or fueled by distorted Christendom creates and sustains aestheticized pseudorealities centered on the self Mature aesthetic existence however anchored in love for God plays a fundamental role in the Christian life both as the incarnational celebration of being fully human and also through the preconscious formation of imaginaries by which we live

Holistic Bioethics Jude Thaddaeus Buyondo, 2024-10-31 In pursuing a holistic bioethics while dialoguing with different sciences appreciation of moral affinities between human and nonhuman entities Dr Buyondo argues for a minimum moral status for nonhuman entities The minimum normative basics of approaches to biomedical ethics are at the very least not distinctive to either human animals or nonhuman animals only The investigation builds further on the African understanding of life where no creation is lifeless In establishing a more inclusive functional bioethics the African approach goes further than biocentrism ecocentrism and holism to ground an inclusive African holistic moral egalitarianism suggesting that all forces and all created things have life We are not emphasizing how every system and creature command equal respect rather everything has life commands respect and moral concern as a minimum imperative within a Black African holistic approach to bioethics However holistic bioethics can neither be Western nor an African invention that people of other cultures only admire from a distance Moreover holistic bioethics doesn t offer the last word on the ethics of nonhuman animals holistic anamnestic solidarity the relational Other and intercultural theological bioethics

Human Extinction Émile P. Torres, 2023-06-15 This volume traces the origins and evolution of the idea of human extinction from the ancient Presocratics through contemporary work on existential risks Many leading intellectuals agree that the risk of human extinction this century may be higher than at any point in our 300 000 year history as a species This book provides insight on the key questions that inform this discussion including when humans began to worry about their own extinction and how the debate has changed over time It establishes a new theoretical foundation for thinking about the ethics of our extinction arguing that extinction would be very bad under most circumstances although the outcome might be on balance good Throughout the book graphs tables and images further illustrate how human choices and attitudes about extinction have evolved in Western history In its thorough examination of humanity s past this book also provides a starting point for understanding our future Although accessible enough to be read by undergraduates *Human Extinction* contains new and

thought provoking research that will benefit even established academic philosophers and historians

A Companion to Hobbes Marcus P. Adams, 2021-10-08 Offers comprehensive treatment of Thomas Hobbes's thought providing readers with different ways of understanding Hobbes as a systematic philosopher As one of the founders of modern political philosophy Thomas Hobbes is best known for his ideas regarding the nature of legitimate government and the necessity of society submitting to the absolute authority of sovereign power Yet Hobbes produced a wide range of writings from translations of texts by Homer and Thucydides to interpretations of Biblical books to works devoted to geometry optics morality and religion Hobbes viewed himself as presenting a unified method for theoretical and practical science an interconnected system of philosophy that provides many entry points into his thought A Companion to Hobbes is an expertly curated collection of essays offering close textual engagement with the thought of Thomas Hobbes in his major works while probing his ideas regarding natural philosophy mathematics human nature civil philosophy religion and more The Companion discusses the ways in which scholars have tried to understand the unity and diversity of Hobbes's philosophical system and examines the reception of the different parts of Hobbes's philosophy by thinkers such as René Descartes Margaret Cavendish David Hume and Immanuel Kant Presenting a diversity of fresh perspectives by both emerging and established scholars this volume Provides a comprehensive treatment of Hobbes's thought in his works including Elements of Law Elements of Philosophy and Leviathan Explores the connecting points between Hobbes metaphysics epistemology mathematics natural philosophy morality and civil philosophy Offers readers strategies for understanding how the parts of Hobbes's philosophical system fit together Examines Hobbes's philosophy of mathematics and his attempts to understand geometrical objects and definitions Considers Hobbes's philosophy in contexts such as the natural state of humans gender relations and materialist worldviews Challenges conceptions of Hobbes's moral theory and his views about the rights of sovereigns Part of the acclaimed Blackwell Companions to Philosophy series A Companion to Hobbes is an invaluable resource for scholars and advanced students of Early modern thought particularly those from disciplines such as History of Philosophy Political Philosophy Intellectual History History of Politics Political Theory and English
