giving excitement and potential of ES cells as models for both the advancement of basic science and future clinical applications I felt it timely to edit this collection of protocols Embryonic Stem Cells in which forefront investigators would provide detailed methods for use of ES cells to study various lineages and tissue types **NIOSH Manual of Analytical Methods: Methods O-Z, indexes** National Institute for Occupational Safety and Health. Division of Physical Sciences and Engineering, 1994 *Introduction to Confocal Fluorescence Microscopy* Michiel Muller, 2006 This book provides a comprehensive account of the theory of image formation in a confocal fluorescence microscope as well as a practical guideline to the operation of the instrument its limitations and the interpretation of confocal microscopy data The appendices provide a quick reference to optical theory microscopy related formulas and definitions and Fourier theory
