The Handbook of Technology and Second Language Teaching and Learning Carol A. Chapelle, Shannon Sauro, 2017-06-28
The Handbook of Technology and Second Language Teaching and Learning presents a comprehensive exploration of the impact of technology on the field of second language learning. The rapidly evolving language technology interface has propelled dramatic changes in and increased opportunities for second language teaching and learning. Its influence has been felt no less keenly in the approaches and methods of assessing learners' language and researching language teaching and learning. Contributions from a team of international scholars make up the Handbook, consisting of four parts: language teaching and learning through technology; the technology pedagogy interface; technology for L2 assessment and research; and development of technology for language learning. It considers how technology assists in all areas of language development: the emergence of pedagogy at the intersection of language and technology; technology in language assessment; and major research issues in research and development of technologies for language learning. It covers all aspects of language, including grammar, vocabulary, reading, writing, listening, speaking, pragmatics, and intercultural learning, as well as new pedagogical and assessment approaches and new ways of conceiving and conducting research and development. The Handbook of Technology and Second Language Teaching and Learning demonstrates the extensive, multifaceted implications of technology for language teachers, learners, materials developers, and researchers.

Fabbriche 4.0. Percorsi di trasformazione digitale della manifattura italiana Raffaele Secchi, Tommaso Rossi, 2019-01-31
L'adozione del paradigma Industry 4.0 e la digitalizzazione dei processi: i produttori rappresentano una grandissima opportunità per il nostro sistema industriale che potrebbe fare un salto di qualità e recuperare quel gap di competitività che viene sempre evocato quando si fanno confronti su scala internazionale. Se l'aspettativa molto elevata, il risultato non per nulla scontato. Un progetto di trasformazione digitale in ambito manifatturiero caratterizzato da un livello di complessità molto elevato per via dei numerosi elementi che devono essere tenuti in considerazione: le potenziali implicazioni sul business model aziendale; le tecnologie abilitanti con le loro interdipendenze; gli impatti sui processi e sulle persone. Quindi indispensabile essere preparati per poter affrontare e guidare il passaggio dalla manifattura tradizionale a quella digitale. Il libro si pone l'obiettivo attraverso l'analisi comparata di otto casi di implementazione di progetti Industry 4.0 di indicare ai lettori quali sono i fattori strategici organizzativi produttivi IT e di filiera che possono abilitare la trasformazione digitale delle fabbriche italiane.

Proximity Violence Ignazia Bartholini,2020-08-30 This book aims at shifting the emphasis from a general vision of gender based violence to a more opaque yet equally destructive one that related to proximity violence The first type of violence is exercised in multiple situations and in the generality of relationships experienced by people involving others who are both strangers to and intimate with each other Proximity violence provides and includes a fiduciary kind of proximity of dependent intimacy where the trust that the victim places in the other her tormentor favours the exercise of violence itself allowing it to take place thus making it practically imperceptible when not actually normal in extreme cases In turn this confidence is comparable to a veil of Maja which in conditions of vulnerability typical of victims attenuates the consequences of the violence undergone or the omens of what becomes violent action The conceptual triad proximity violence vulnerability resistance resilience is explored here in the three main chapters and in the details aimed at identifying in the final chapter the mutual interconnections This book will be of particular interest and use to undergraduate and graduate students of
