Ann Vileisis

Perfection Salad Perfection Salad:

Perfection Salad Laura Shapiro, 2008-10-02 This social history tells the story of America's transformation from a nation of honest appetites into an obedient market for instant mashed potatoes. The author investigates women reformers at the turn of the twentieth century including Fannie Farmer of the Boston Cooking School who were determined to modernize the American diet through a scientific approach to cooking. It reveals why we think the way we do about food today. Publisher's description

The Saturated World Beverly Gordon, 2006 Explores the way middle class American women in the late nineteenth and early twentieth centuries added meaning to their lives through their domestic amusements, leisure pursuits that took place in and were largely focused on the home. Women elaborated on their everyday tasks and responsibilities with these amusements, thus cultivating a heightened aesthetically charged, saturated state and created self-contained, enchanted worlds.

Kitchen Literacy Ann Vileisis, 2008-02 Ask children where food comes from and they'll probably answer the supermarket. Ask most adults and their replies may not be much different. Where our foods are raised and what happens to them between farm and supermarket shelf have become mysteries. How did we become so disconnected from the sources of our breads, beef, cheeses, cereal, apples, and countless other foods that nourish us every day? Ann Vileisis's answer is a sensory-rich journey through the history of making dinner. Kitchen Literacy takes us from an eighteenth-century garden to today's sleek supermarket aisles and eventually to farmer's markets that are now enjoying a resurgence. Vileisis chronicles profound changes in how American cooks have considered their foods over two centuries and delivers a powerful statement: what we don't know could hurt us. As the distance between farm and table grew, we went from knowing particular places and specific stories behind our foods' origins to instead relying on advertisers' claims. The woman who raised, plucked, and cooked her own chicken knew its entire life history, while today most of us have no idea whether hormones were fed to our poultry. Industrialized eating is undeniably convenient, but it has also created health and environmental problems, including food-borne pathogens, toxic pesticides, and pollution from factory farms. Though the hidden costs of modern meals can be high, Vileisis shows that greater understanding can lead consumers to healthier and more sustainable choices. Revealing how knowledge of our food has been lost and how it might now be regained, Kitchen Literacy promises to make us think differently about what we eat.

The Truth about Baked Beans Meg Muckenhoupt, 2015-09-25 The author of Cabbage: A Global History forages through New England's most famous foods for the truth behind the region's culinary myths. Meg

Muckenhoupt begins with a simple question When did Bostonians start making Boston Baked Beans You may have heard that the Pilgrims learned the dish from Native Americans but the recipe was actually the result of a conscious effort in the late nineteenth century to create New England foods New England foods were selected and resourcefully reinvented from fanciful stories about what English colonists cooked prior to the American revolution while pointedly ignoring the foods cooked by contemporary New Englanders especially the large immigrant populations who were powering industry and taking over farms around the region The Truth About Baked Beans explores New England s culinary myths and reality through some of the region s most famous foods baked beans brown bread clams cod and lobster maple syrup pies and Yankee pot roast From 1870 to 1920 the idea of New England food was carefully constructed in magazines newspapers and cookbooks often through fictitious and sometimes bizarre origin stories touted as time honored American legends This toothsome volume reveals the effort that went into the creation of these foods and lets us begin to reclaim the culinary heritage of immigrant New England the French Canadians Irish Italians Portuguese Polish Indigenous people African Americans and other New Englanders whose culinary contributions were erased from this version of New England food Complete with historic and contemporary recipes The Truth About Baked Beans delves into the surprising history of this curious cuisine explaining why and how New England food actually came to be

Putting Their Hands on Race Danielle T. Phillips-Cunningham,2020 Putting Their Hands on Race is an intersectional and comparative labor history of southern African American and Irish immigrant women who labored as domestic workers after migrating to northeastern cities during the nineteenth and twentieth centuries Repast Michael Lesy,Lisa Stoffer,2013-10-21 What we ate how we ate and how eating changed during America s first real food revolution 1900 1910 Before Julia Child introduced the American housewife to France s cuisine bourgeoisie before Alice Waters built her Berkeley shrine to local food before Wolfgang Puck added Asian flavors to classical dishes and caviar to pizza the restaurateurs and entrepreneurs of the early twentieth century were changing the way America ate Beginning with the simplest eateries and foods and culminating with the emergence of a genuinely American way of fine dining Repast takes readers on a culinary tour of early twentieth century restaurants and dining The innovations introduced at the time in ingredients technologies meal service and cuisine transformed the act of eating in public in ways that persist to this day Illustrated with photographs from the time as well as color plates reproducing menus from the New York Public Library s Buttolph Menu Collection Repast is a remarkable record of the American palate

Agriculture, 1974 The Shopper's Guide The 1974 Yearbook of Agriculture is a comprehensive resource published by the U S Department of Agriculture This publication is designed to assist consumers in making informed choices about agricultural products and services emphasizing the importance of consumer education within the context of agriculture American Home Cooking Tim Miller, 2017-07-01 American Home Cooking provides an answer to the question of why in the face of all the modern technology we have for saving time Americans still spend time in their kitchens cooking Americans eat four to five meals per week in a restaurant and buy millions of dollars worth of convenience foods Cooking especially from scratch is clearly on its way out However if this is true why do we spend so much money on kitchen appliances both large and small Why are so many cooking shows and cookbooks published each year if so few people actually cook In American Home Cooking Timothy Miller argues that there are historical reasons behind the reality of American cooking There are some factors that over the past two hundred years have kept us close to our kitchens while there are other factors that have worked to push us away from our kitchens At one end of the cooking and eating continuum is preparing meals from scratch all ingredients are raw and unprocessed and in extreme cases grown at the home On the other end of the spectrum is dining out at a restaurant where no cooking is done but the family is still fed All dining experiences exist along this continuum and Miller considers how American dining has moved along the continuum He looks at a number of different groups and trends that have affected the state of the American kitchen stretching back to the early 1800s These include food and appliance companies the restaurant industry the home economics movement of the early 20th century and reform movements such as the counterculture of the 1960s and the religious reform movements of the 1800s And yet the kitchen is still most often the center of the home and the place where most people expect to cook and eat even if they don't
