Performance Audit Manual Canada:

Environmental Performance Auditing in the Public Sector Awadhesh Prasad, 2018-06-14 Environment and sustainable development challenges are a matter of global concern Trillions of dollars of mostly public money are invested every year in domestic and international policies and programs to address these challenges The effectiveness of these policies and programs is critical to environmental sustainability Performance audits that examine the effectiveness of governmental policies and programs heavily influence their implementation Despite this performance auditing in the environment field has received very little academic attention This book takes a closer look at performance auditing of public sector environmental policies and programs It examines trends in global environmental performance auditing and how it is currently practiced drawing on a global survey and case studies from Canada India and Australia In doing so it identifies issues and challenges faced by Supreme Audit Institutions in undertaking these performance audits This book will be of interest to students scholars and practitioners of sustainable development environmental auditing and public sector auditing as well as to donor organisations engaged in these areas *Performance Auditing* Jeremy Lonsdale, Peter Wilkins, Tom Ling, 2011-01-01 It is time 15 years on from the coining of the Audit Explosion to re appraise the growth of new forms of auditing As we move into what might be called Auditing in Austerity this book gives us that overview An extremely well informed team of authors has been assembled to deliver a comparative analysis that successfully mixes insider and outsider perspectives This should be required reading not just for auditors and their academic hangers on but for the wider audience of those interested in contemporary developments in democratic accountability and policymaking Christopher Pollitt Catholic University of Leuven Belgium This book fills an important gap in the market At a time when governments around the world face the largest deficits in decades there is a strong need to reduce public expenditures whilst ensuring greater value for money from public services This book addresses these concerns and many more Each of the chapter authors is a senior practitioner and or an academic who specialises in performance auditing and accountability in modern complex democracies They explore the nature of the concepts which underlie current practice set out a variety of institutional structures and processes and identify the limits of both theory and practice These make this a book of considerable significance and one which makes an important contribution to our understanding of the democratic process This is not a narrowly focused book only of interest to those who specialise in performance auditing Given the richness of its analysis and the fine grained understanding of institutions and processes it has much to say to students of public administration management and policy analysis I am confident that this will rapidly become the standard reference for those who are interested in performance auditing Peter M Jackson AcSS University of Leicester UK What a good read Insightful and challenging It is likely to incite a lot of discussion on the wide ranging views from the very well informed and qualified contributors not least from those who actually have to implement the findings and recommendations of performance audit reports The focus is rightly on

accountability for performance not only in achieving government program objectives in an economic efficient and effective manner but also on the audit institutions themselves It should be welcomed by the public sector and particularly by the parliamentary institutions concerned with achieving accountability for government performance Pat Barrett AO Australian National University and former Australian Auditor General 1995 2005 This book is a much welcome tonic for public administration It is one of the few books that explicitly focus on how audit institutions carry out their performance auditing responsibilities While auditors will likely read this the authors have geared the book to a broader readership including public managers who are often the subject of performance audits From the foreword by Paul Posner George Mason University US This state of the art book examines the development of performance audit drawing on the experience in a number of different countries including the United Kingdom the United States Australia the Netherlands and Belgium The expert contributors identify the trajectory of performance audit examine how it is conducted and consider what it is contributing to effective government They conclude that in the face of new challenges performance auditors should focus both on their core responsibilities to ensure accountability and continue to develop more insightful and sophisticated approaches to enable them to assess the growing complexity of the delivery of public services By doing so they can continue to play a valuable role in democratic accountability Providing an up to date overview and discussion of performance audit this highly topical book will appeal to all those working within audit academics working in the fields of public management and public administration as well practitioners in and close to state audit institutions Members of Parliament evaluators internal auditors researchers policy analysts and consultants will also find this book invaluable

Crossover of Audit and Evaluation Practices Maria Barrados, Jeremy Lonsdale, 2020-02-24 Crossover of Audit and Evaluation Practices brings together academic analysis with insights from practitioners to discuss the potential for collaboration in audit and evaluation practices between three professional disciplines Clearly written and thoughtfully organized this volume is structured in three parts to deal with theory practice issues and how the practices have worked together Part One provides definitions of performance audit internal audit and program evaluation Part Two addresses several challenges that professionals face in applying these standards and principles Part Three contains examples of organizational collaboration between the practices how they have worked together and the lessons that were learned from that experience Specific cases from the Government Accountability Office and UNESCO UNDP and Inter Americas Development Bank illustrate what has worked or not and suggest reasons why Crossover of Audit and Evaluation Practices offers even the most skilled and experienced professional insight on how to bridge some of the divides It will help generate a better understanding of the activities and services that are either imposed on them or are freely available and help to stimulate their optimal use

and local government non profit organizations political culture and reform of the policy process This book provides assessment of national strategies for reform in public administration and policy how these strategies have fared in implementation and what challenges must be overcome to achieve real and sustainable progress Seven country case studies will explore the overall policy making process from a critical perspective and consider how it could be strengthened Four cases will deal with the controversial issues of decentralization of power and decision making Two cases will address the role of civil society in the policymaking and reform process Introductory and concluding chapters will place these discussions in context and draw the primary lessons for policy makers The main objectives of the book are to present different examples of specific public policy and administration as well as governance issues in the Middle East so that policymakers both in the region and the world who are interested in the Middle East as well as practitioners scholars and graduate students can utilize the book as a study guide to better understand various dynamics in governance in the Middle East This approach will enable the volume to bridge global perspectives on governance development with regional perspectives and experience bringing shared expertise intellectual inquisitiveness and experience in the professional practice of public policy and administration to bear on these common challenges *Overpromising and Underperforming?* Peter Graefe, Julie

Simmons, Linda A. White, 2013-01-08 Public reporting has been used experimentally in federal provincial relations since the mid 1990s as an accountability mechanism to promote policy effectiveness intergovernmental cooperation and democratic legitimacy Our understanding of how well it is working however remains limited to very specific policy sectors even though this information is essential to policy makers in Canada and beyond *Overpromising and Underperforming* offers a deeper analysis of the use of new accountability mechanisms paying particular attention to areas in which federal spending power is used This is the first volume to specifically analyse the accountability features of Canadian intergovernmental agreements and to do so systematically across policy sectors Drawing on the experiences of other federal systems and multilevel governance structures the contributors investigate how public reporting has been used in various policy fields and the impact it has had on policy making and intergovernmental relations **Speaking Out on Human Rights** Pearl Eliadis, 2014-04-01

Canadians like to see themselves as champions of human rights in the international community Closer to home however the human rights system in Canada particularly its public institutions such as commissions and tribunals has been the object of sustained debate and vehement criticism based largely on widespread myths about how it works In *Speaking Out on Human Rights* Pearl Eliadis explodes these myths analysing the pervasive distortions and errors on which they depend Canada's human rights system a unique legal tradition operating within a powerful modern constitution is a fundamental mechanism for ensuring the practical application of our national commitment to tolerance and inclusion Drawing on in depth interviews with Canada's leading human rights experts and extensive original research Eliadis explores the evolution of commissions and tribunals as vehicles of public policy and considers their mandate to mediate rights conflicts in such contested areas as

hate speech religious freedoms and sexuality She provides a frank assessment of how Canada's human rights system functions and argues that misplaced critiques have prevented urgent and necessary discussions about the reforms that are needed to improve fairness and equality before the law and to ensure institutional independence impartiality and competence Speaking Out on Human Rights shows how our human rights system plays a unique and important role in the rights revolution both in Canada and internationally and offers promising avenues for its future development
