Aikhenvald, 2003-08-07 This is a comprehensive reference grammar of Tariana an endangered Arawak language from a remote region in the northwest Amazonian jungle Its speakers traditionally marry someone speaking a different language and as a result most people are fluent in five or six languages Because of this rampant multilingualism Tariana combines a number of features inherited from the protolanguage with properties diffused from neighbouring but unrelated Tucanoan languages Typologically unusual features of the language include an array of classifiers independent of genders complex serial verbs case marking depending on the topicality of a noun and double marking of case and of number Tariana has obligatory evidentiality every sentence contains a special element indicating whether the information was seen heard or inferred by the speaker or whether the speaker acquired it from somebody else This grammar will be a valuable source book for linguists and others interested in natural languages *Guía fotográfica de las aves de la Universidad Pedagógica Nacional y experiencias pedagógicas en ornitología* Rodríguez Villamil, David Ricardo, Cárdenas, Yeison Ricardo, Fuentes, Jeny Andrea, Gallego, Sindy Jineth, Arango Campuzano, Santiago, Cortés Gutiérrez, Juan Miguel, 2019-04-30 Este libro es el resultado de un proceso investigativo que buscó reconocer el gran potencial pedagógico didáctico y biológico que tiene la UPN para el estudio y conservación de las aves La publicación es el fruto de más de dos años de trabajo de observación de registro fotográfico y de investigación en tres sedes de la institución Parque Nacional Valmar a y calle 72 y en otras regiones del país donde se realizaron trabajos pedagógicos que involucraron a las aves como una estrategia educativa **Encyclopedia metódica. Historia natural de las aves** Louis Jean Marie Daubenton, 1788 **Encyclopedia Metódica: historia natural de las aves, 2**, 1788 Language Contact in Amazonia Aleksandra Iľ'evna Aikhenval'd, 2002 This book considers how forms and meanings of different languages at different times may resemble one another and what the explanation is for this The author aims a to explain and identify the relationship between areal diffusion and the genetic development of languages and b to discover the means of distinguishing what may cause one language to share the characteristics of another This is done using the example of Arawak and Tucanoan languages spoken in the large area of the Vaup's river basin in northwest Amazonia which spans Colombia and Brazil In this region language is seen as a badge of identity language mixing interaction and influence are resisted for ideological reasons Professor Aikhenvald considers which grammatical categories are most and which are least likely to be borrowed in a

situation of prolonged language contact where lexical borrowing is reduced to a minimum She provides a genetic analysis of the languages of the region and considers their historical relationships with languages of the same family outside it She also examines changes brought about by recent contact with European languages and culture and the linguistic and cultural effects of being part of a group that is aware its language and identity are threatened The book is presented in relatively nontechnical language and will interest linguists and anthropologists *Gazetteer of Bolivia* ,1992
