The Persian Empire Amélie Kuhrt, 2013-04-15 Bringing together a wide variety of material in many different languages that exists from the substantial body of work left by this large empire The Persian Empire presents annotated translations together with introductions to the problems of using it in order to gain an understanding of the history and working of this remarkable political entity The Achaemenid empire developed in the region of modern Fars Iran and expanded to unite territories stretching from the Aegean and Egypt in the west to Central Asia and north west India which it ruled for over 200 years until its conquest by Alexander of Macedon Although all these regions had long since been in contact with each other they had never been linked under a single regime The Persian empire represents an important phase of transformation for its subjects such as the Jews as well as those living on its edges such as the European Greeks

The Concept of Monument in Achaemenid Empire Mehr Azar Soheil, 2018-12-07 The aim of this book is to explore the

significance of the concept of monument in the context of the Achaemenid Empire 550-330 BC with particular reference to the Royal Ensemble of Persepolis founded by Darius I and built together with his son Xerxes. While Persepolis was built as an intentional monument, it had already become an historic monument during the Achaemenid period. It maintained its symbolic significance in the following centuries even after its destruction by Alexander of Macedonia in 330 BC. The purpose of building Persepolis was to establish a symbol and a common reference for the peoples of the Empire with the Achaemenid Dynasty transmitting significant messages and values such as peace, stability, grandeur and praise for the dynastic figure of the king as the protector of values and fighting falsehood. While previous research on Achaemenid heritage has mainly been on archaeological and art historical aspects of Persepolis, the present work focuses on the architecture and design of Persepolis. It is supported by studies in the fields of archaeology, history and art history as well as by direct survey of the site. The morphological analysis of Persepolis, including the study of the proportions of the elevations and the verification of a planning grid for the layout of the entire ensemble, demonstrate the univocal will by Darius to plan Persepolis following a precise initial scheme. The study shows how the inscriptions, bas-reliefs and the innovative architectural language together express the symbolism, values and political messages of the Achaemenid Dynasty, exhibiting influence from different lands in a new architectural language and in the plan of the entire site.
