Color and Meaning in the Art of Achaemenid Persia Alexander Nagel, 2023-09-14 In this volume Alexander Nagel investigates the use of polychromy in the art and architecture of ancient Iran. Focusing on Persepolis he explores the topic within the context of the modern historiography of Achaemenid art and the scientific investigation of a range of works and monuments in Iran and in museums around the world. Nagel's study contextualizes scholarly efforts to retrieve aspects of ancient polychromies in Western Asia and interrogates current debates about the contemporary use of color in the architecture and sculpture in the ancient Mediterranean world especially in North Africa and the eastern Mediterranean. Bringing a multi disciplinary perspective to the topic Nagel also highlights the important role of theory methodology and conservation studies in the process of reconstructing polychromy in ancient monuments. A celebration of the work of painters artisans craftsmen and women of Iran's past his volume suggests frameworks through which historical and contemporary research play a dynamic role in the reconstruction of ancient technological knowledge.
