Professor Penguin Lloyd Spencer Davis, 2014-10-17 Meet Bill Bryson in Antarctica in this engaging book by one of the world's authority on penguins Part memoir partly the research of a field biologist Professor Penguin could be called How Penguins Shaped My Life Based on journals kept during Davis's years of working with penguins in the wild the story takes readers to remote locations Antarctica the Galapagos the deserts of Chile

and Peru the Falkland Islands the wild coasts of Argentina and South Africa and New Zealand Davis a world authority on penguins reveals that these box office favourites are not the cute mate for life animals we've been led to believe He also reveals that penguins are a lot like humans sometimes disturbingly so when it comes to their basic needs sex food shelter marriage family and travel Over the years that Davis studies penguins he realises that they are far more complex and nuanced than he imagines at his first encounter They really don't deserve to be seen as so black and white He expertly marries scientific knowledge with his own anecdotes told with humour hard earned knowledge and insight He also includes stories about those who have helped advance our knowledge of penguins other Professor Penguins Implicit throughout is Davis's philosophy the more we learn about the natural world and specifically penguins the more we learn about ourselves And he asks Is the isolation of Antarctica sufficient to protect penguins from us

Flight Ways Thom van Dooren, 2014-06-03 A leading figure in the emerging field of extinction studies Thom van Dooren puts philosophy into conversation with the natural sciences and his ethnographic encounters to vivify the cultural and ethical significance of modern day extinctions Unlike other meditations on the subject *Flight Ways* incorporates the particularities of real animals and their worlds drawing philosophers natural scientists and general readers into the experience of living among and losing biodiversity Each chapter of *Flight Ways* focuses on a different species or group of birds North Pacific albatrosses Indian vultures an endangered colony of penguins in Australia Hawaiian crows and the iconic whooping cranes of

North America Written in eloquent and moving prose the book takes stock of what is lost when a life form disappears from the world the wide ranging ramifications that ripple out to implicate a number of human and more than human others Van Dooren intimately explores what life is like for those who must live on the edge of extinction balanced between life and oblivion taking care of their young and grieving their dead He bolsters his studies with real life accounts from scientists and local communities at the forefront of these developments No longer abstract entities with Latin names these species become fully realized characters enmeshed in complex and precarious ways of life sparking our sense of curiosity concern and accountability toward others in a rapidly changing world

Wilde verhalen Lucy Cooke, 2018-10-10 Over dieren zijn door de eeuwen heen de raarste verhalen de wereld in geslingerd door invloedrijke denkers van Aristoteles tot Walt Disney Als het op het werkelijk doorgronden van dieren aankomt hebben we nog een lange weg te gaan Lucy Cooke ontrafelt talloze hardnekkige misverstanden over dieren en laat zien hoe de verhalen die we bedenken meer over ons zeggen dan over de beesten in kwestie Fascinerend verbluffend en buitengewoon hilarisch

The Unexpected Truth About Animals Lucy Cooke, 2017-10-19 Shortlisted for the 2018 Royal Society Investment Science Book Prize Endlessly fascinating Bill Bryson Eye opening informative and very funny Chris Packham Well informed and downright funny Richard Dawkins History is full of strange animal stories invented by the brightest and most influential from Aristotle to Disney But when it comes to understanding animals we've got a long way to go Whether we're watching a viral video of romping baby pandas or looking at a picture of penguins holding hands we often project our own values innocence abstinence hard work onto animals So you've probably never considered that moose get drunk and that penguins are notorious cheats In **The Unexpected Truth About Animals** Zoologist Lucy unravels many such myths that eels are born from sand that swallows hibernate under water and that bears gave birth to formless lumps that are licked into shape by their mothers to show that the stories we create reveal as much about us as they do about the animals Astonishing illuminating and laugh out loud funny

Penguins of the World, 2007 Text and color photos examine the lives of various species of penguin covering their evolution habitats mating family life food and development from chick to adult
