Kooyman, Wayne Lynch, 2013-10-15 Whether you hope to travel to the Southern Hemisphere or simply want to learn more about wildlife Penguins The Animal Answer Guide deserves a spot on your bookshelf Problem Solving for Engineers David G. Carmichael, 2013-06-04 Whatever their discipline engineers are routinely called upon to develop solutions to all kinds of problems To do so effectively they need a systematic and disciplined approach that considers a range of alternatives taking into account all relevant factors before selecting the best solution In Problem Solving for Engineers David Carmichael demonstrates just such an approach involving problem definition generation of alternative solutions and ultimately the analysis and selection of a preferred solution David Carmichael introduces the fundamental concepts needed to think systematically and undertake methodical problem solving He argues that the most rational way to develop a framework for problem solving is by using a systems studies viewpoint He then outlines systems methodology modeling and the various configurations for analysis synthesis and investigation Building on this the book details a systematic process for problem solving and demonstrates how problem solving and decision making lie within a systems synthesis configuration Carefully designed as a self learning resource the book contains exercises throughout that reinforce the material and encourage readers to think and apply the concepts It covers decision making in

the presence of uncertainty and multiple criteria including that involving sustainability with its blend of economic social and environmental considerations It also characterizes and tackles the specific problem solving of management planning and design The book provides for the first time a rational framework for problem solving with an engineering orientation I Miss You When I Blink Mary Laura Philpott,2020-04-07 NATIONAL BESTSELLER A charmingly relatable and wise memoir in essays by acclaimed writer and bookseller Mary Laura Philpott the modern day reincarnation of Nora Ephron Erma Bombeck Jean Kerr and Laurie Colwin all rolled into one The Washington Post about what happened after she checked off all the boxes on a successful life s to do list and realized she might need to reinvent the list and herself Mary Laura Philpott thought she d cracked the code Always be right and you ll always be happy But once she d completed her life s to do list job spouse house babies check she found that instead of feeling content and successful she felt anxious Lost Stuck in a daily grind of overflowing calendars grueling small talk and sprawling traffic She d done everything right but still felt all wrong What s the worse failure she wondered smiling and staying the course or blowing it all up and running away And are those the only options Taking on the conflicting pressures of modern adulthood Philpott provides a frank and funny look at what happens when in the midst of a tidy life there occur impossible to ignore tugs toward creativity meaning and the possibility of something more Southern Living She offers up her own stories to show that identity crises don t happen just once or only at midlife and reassures us that small recurring personal re inventions are both normal and necessary Most of all in this warm embrace of a life lived imperfectly Esquire Philpott shows that when you stop feeling satisfied with your life you don t have to burn it all down You can call upon your many selves to figure out who you are who you re not and where you belong Who among us isn t trying to do that Be forewarned that you ll laugh out loud and cry probably in the same essay Philpott has a wonderful way of finding humor even in darker moments This is a book you ll want to buy for yourself and every other woman you know Real Simple The Myth of Human Supremacy Derrick Jensen,2016-08-30 In this impassioned polemic radical environmental philosopher Derrick Jensen debunks the near universal belief in a hierarchy of nature and the superiority of humans Vast and underappreciated complexities of nonhuman life are explored in detail from the cultures of pigs and prairie dogs to the creative use of tools by elephants and fish to the acumen of caterpillars and fungi The paralysis of the scientific establishment on moral and ethical issues is confronted and a radical new framework for assessing the intelligence and sentience of nonhuman life is put forth Jensen attacks mainstream environmental journalism which too often limits discussions to how ecological changes affect humans or the economy with little or no regard for nonhuman life With his signature compassionate logic he argues that when we separate ourselves from the rest of nature we in fact orient ourselves against nature taking an unjust and in the long run impossible position Jensen expresses profound disdain for the human industrial complex and its ecological excesses contending that it is based on the systematic exploitation of the earth Page by page Jensen who has been called the philosopher poet of the environmental movement demonstrates his deep appreciation of

the natural world in all its intimacy and sounds an urgent call for its liberation from human domination
