People Population And Policy In Indonesia:

People, Population, and Policy in Indonesia Terence H. Hull, 2005 Since its inception in 1945 the Republic of Indonesia has experienced a series of profound social changes The spread of schooling the transformation of the economy and the consolidation of a unified state have transformed the lives of Indonesian citizens It is seldom recognized however that the most fundamental changes have occurred in the family sphere Marriages that used to be arranged by parents are now more likely to be determined by couples Unions occur when the couples are much older The adoption of birth control practices has reduced fertility from large families to a two child norm in just over thirty years These changes have molded the lives of individual women described here through a series of personal case studies and shaped the size and structure of the national population as seen in the statistics produced by the government on a regular basis The story that emerges gives strong hints about where the Indonesian population will be heading in the next fifty years with a growing proportion of aged citizens Most importantly *People Population and Policy in Indonesia* shows the importance of collaborations between Indonesian leaders and their foreign colleagues in the efforts to reshape the Indonesian population and improve its social and economic welfare

Reproductive States Rickie Solinger, Mie Nakachi, 2016-01-04 In *Reproductive States* a group of international scholars explore the population politics policies and practices adopted in various countries and offer reflections on the outcomes of those policies and their legacies The essays in this volume focus on the context that stimulated nations to develop demographic imperatives regarding population size and quality and consider how those imperatives became unique sets of priorities and strategies They also illuminate how these nations crafted their own policies and practices often while responding to United Nations and U S driven population goals tactics and interventions

The Politics of Migration in Indonesia and Beyond Riwanto Tirtosudarmo, 2019-01-22 This book examines the social and political dimensions of migration from a perspective between the realms of demography and politics It approaches the issue of migration by highlighting the important power relations that have previously been neglected in studies in the area The book starts by investigating Indonesian migration to provide an understanding of internal migration It then looks beyond its national borders for a wider understanding of Asia and showcases several case studies both in Indonesia and beyond to illustrate the intricate politics of migration Further it considers the politics of migration from the sending country perspective and unravels the link between migration and security The book provides reviews of the wider literature relating to population mobility and distribution and shows readers how to adopt a new perspective in the study of movement of people an issue that is becoming increasingly important as movement of people unfolds globally in terms of both volume and direction This book is a valuable resource for students academics and researchers in the area of demography and social politics especially those interested in migration and refugees It also offers insights for those

Islam and the Securitisation of Population Policies Katrina Riddell, 2016-05-06 There has been much scholarly debate on the politically disruptive capabilities of Islam and the threats to global security posed by or to Muslim states and societies but within this dialogue there has been little recognition of the role of population policies in security issues Katrina Riddell's study focuses specifically on Islam and the securitization of population policies and sustainability Opening with a discussion of contemporary population discourses and their historical foundations the book examines how population growth has become an international security issue The author takes the examples of Pakistan and Iran to provide a nuanced understanding of Muslim states interaction with global debates on sustainability She also explores how Muslim and non Muslim states societies and agents perceive issues of population growth and control Providing an innovative approach to the pursuit of global sustainability and security this book presents useful material to scholars whose research focuses on Islam and the future
