Peoples Of The Tundra Northern Siberians In The Post Communist Transition:

Peoples of the Tundra John P. Ziker, 2002-04-11 On ethnographic grounds alone Ziker's book is a unique and valuable contribution. Despite increased fieldwork opportunities for foreigners in the former Soviet Union in recent years, much of Russia and Siberia remains terra incognita to Western scholars except for specialists who know the Russian literature. Ziker's account of the Dolgan and Nganasan peoples of the Ust'-Avam community is a fascinating analysis of how people adapt their hunting, fishing, and herding not only to the demanding Arctic environment but also to enormous economic and political adversities created in the wake of the Soviet Union's collapse. In this sense, the book fills a gap in the ethnographic literature on Siberia for Western students and at the same time serves as a microcosm of the devastating changes affecting rural communities and indigenous peoples generally in a disintegrating former superpower that is increasing isolation and a shift to nonmarket survival economies. Experimenting with Social Norms Jean Ensminger, Joseph Henrich, 2014-10-22

Questions about the origins of human cooperation have long puzzled and divided scientists. Social norms that foster fair-minded behavior, altruism, and collective action undergird the foundations of large-scale human societies, but we know little about how these norms develop or spread or why the intensity and breadth of human cooperation varies among different populations. What is the connection between social norms that encourage fair dealing and economic growth? How are these social norms related to the emergence of centralized institutions? Informed by a pioneering set of cross-cultural data, *Experimenting with Social Norms* advances our understanding of the evolution of human cooperation and the expansion of complex societies. Editors Jean Ensminger and Joseph Henrich present evidence from an exciting collaboration between anthropologists and economists. Using experimental economics games, researchers examined levels of fairness, cooperation, and norms for punishing those who violate expectations of equality across a diverse swath of societies, from hunter-gatherers in Tanzania to a small town in rural Missouri. These experiments tested individuals' willingness to conduct mutually beneficial transactions with strangers that reap rewards only at the expense of taking a risk on the cooperation of others. The results show a robust relationship between exposure to market economies and social norms that benefit the group over narrow economic self-interest. Levels of fairness and generosity are generally higher among individuals in communities with more integrated markets. Religion also plays a powerful role. Individuals practicing either Islam or Christianity exhibited a stronger sense of fairness, possibly because religions with high moralizing deities equipped with ample powers to reward and punish encourage greater prosociality. The size of the settlement also had an impact. People in larger communities were more willing to punish unfairness compared to those in smaller societies. Taken together, the volume supports the hypothesis that social norms evolved over thousands of years to allow strangers in more complex and large settlements to coexist, trade, and prosper. Innovative and ambitious, *Experimenting with Social Norms* synthesizes an unprecedented analysis of social behavior from an immense range of human societies. The fifteen case studies analyzed in this volume, which include field experiments in Africa

South America New Guinea Siberia and the United States are available for free download on the Foundation's website www.russellsage.org

The 1926/27 Soviet Polar Census Expeditions David G. Anderson, 2011-05-01 In 1926-27 the Soviet Central Statistical Administration initiated several yearlong expeditions to gather primary data on the whereabouts economy and living conditions of all rural peoples living in the Arctic and sub Arctic at the end of the Russian civil war Due partly to the enthusiasm of local geographers and ethnographers the Polar Census grew into a massive ethnological exercise gathering not only basic demographic and economic data on every household but also a rich archive of photographs maps kinship charts narrative transcripts and museum artifacts To this day it remains one of the most comprehensive surveys of a rural population anywhere The contributors to this volume all noted scholars in their region have conducted long term fieldwork with the descendants of the people surveyed in 1926-27 This volume is the culmination of eight years work with the primary record cards and was supported by a number of national scholarly funding agencies in the UK Canada and Norway It is a unique historical ethnographical analysis and of immense value to scholars familiar with these communities contemporary cultural dynamics and legacy

Arctic Pastoralist Sakha Hiroki Takakura, 2015 Presents a fascinating analysis of the horse and cattle breeding culture of the Sakha Back cover

The Way of Kinship Alexander Vaschenko, Claude Clayton Smith, N. Scott Momaday, 2010-11-19 Prose poetry and drama from Siberia the first anthology of its kind in English

Human Bioarchaeology of the Transition to Agriculture Ron Pinhasi, Jay T. Stock, 2011-06-24 A holistic and comprehensive account of the nature of the transition from hunting to farming in prehistory It addresses for the first time the main bioarchaeological aspects such as changes in mobility behaviour diet and population dynamics This book is of major interest to the relevant audience since it offers for the first time a global perspective on the bioarchaeology of the transition to agriculture It includes contributions from world class researchers with a particular emphasis on advances in methods e.g. ancient DNA of pathogens stable isotope analysis etc The book specifically addresses the following aspects associated with the transition to agriculture in various world regions

Changes in adult and subadult stature and subadult growth profiles Diachronic trends in the analysis of functional morphological structures craniofacial vault lower limbs etc and whether these are associated with change in overall sex specific morphological variability Changes in mobility Changes in behaviour which can be reconstructed from the study of the skeletal record These include changes in activity patterns sexual dimorphism evidence of inter personal trauma and the like Population dynamics and microevolution by examining intra and inter population variations in dental and cranial metric traits as well as archaeogenetic studies of ancient DNA e g mtDNA markers

The Routledge Handbook of the Bioarchaeology of Climate and Environmental Change Gwen Robbins Schug, 2020-10-27 This handbook examines human responses to climatic and environmental changes in the past and their impacts on disease patterns nutritional status migration and interpersonal violence Bioarchaeology the study of archaeological human skeletons provides direct evidence of the human experience of past climate and environmental changes and serves as an important complement to paleoclimate historical and archaeological approaches to changes we may expect with global warming Comprising 27 chapters from experts across a broad range of time periods and geographical regions this book addresses hypotheses about how climate and environmental changes impact human health and well being factors that promote resilience and circumstances that make migration or interpersonal violence a more likely outcome The volume highlights the potential relevance of bioarchaeological analysis to contemporary challenges by organizing the chapters into a framework outlined by the United Nations Sustainable Development Goals for 2030 Planning for a warmer world requires knowledge about humans as biological organisms with a deep connection to Earth's ecosystems balanced by an appreciation of how historical and socio cultural circumstances socioeconomic inequality degrees of urbanization community mobility and social institutions play a role in shaping long term outcomes for human communities Containing a wealth of nuanced perspectives about human environmental relations book is key reading for students of environmental archaeology bioarchaeology and the history of disease By providing a longer view of contemporary challenges it may also interest readers in public health public policy and planning

Settlers on the Edge Niobe Thompson, 2009-01-01 Based on extensive research in the Arctic Russian region of Chukotka *Settlers on the Edge* is the first English language account of settler life anywhere in the circumpolar north to appear since Robert Paine's *The White Arctic* 1977 and the first to explore the experiences of Soviet era migrants to the far north Niobe Thompson describes the remarkable transformation of a population once dedicated to establishing colonial power on a northern frontier into a rooted community of locals now resisting a renewed colonial project He also provides unique insights into the future of identity politics in the Arctic the role of resource capital and the oligarchs in the Russian provinces and the fundamental human questions of belonging and transience

The SAGE Handbook of Social Anthropology Richard Fardon, Oliva Harris, Trevor H J Marchand, Cris Shore, Veronica Strang, Richard Wilson, Mark Nuttall, 2012-07-25 In two volumes the SAGE Handbook of Social Anthropology provides the definitive overview of contemporary research in the

discipline It explains the what where and how of current and anticipated work in Social Anthropology With 80 authors contributing more than 60 chapters this is the most comprehensive and up to date statement of research in Social Anthropology available and the essential point of departure for future projects The Handbook is divided into four sections Part I Interfaces examines Social Anthropology s disciplinary connections from Art and Literature to Politics and Economics from Linguistics to Biomedicine from History to Media Studies Part II Places examines place region culture and history from regional area studies to a globalized world Part III Methods examines issues of method from archives to war zones from development projects to art objects and from ethics to comparison Part IV Futures anticipates anthropologies to come in the Brain Sciences in post Development in the Body and Health and in new Technologies and Materialities Edited by the leading figures in social anthropology the Handbook includes a substantive introduction by Richard Fardon a think piece by Jean and John Comaroff and a concluding last word on futures by Marilyn Strathern The authors each at the leading edge of the discipline contribute in depth chapters on both the foundational ideas and the latest research Comprehensive and detailed this magisterial Handbook overviews the last 25 years of the social anthropological imagination It will speak to scholars in Social Anthropology and its many related disciplines
