Perception And Knowledge A Phenomenological Account:

Perception and Knowledge Walter Hopp, 2011-04-07 This book offers a provocative clear and rigorously argued account of the nature of perception and its role in the production of knowledge. Walter Hopp argues that perceptual experiences do not have conceptual content and that what makes them play a distinctive epistemic role is not the features which they share with beliefs but something that in fact sets them radically apart. He explains that the reason giving relation between experiences and beliefs is what Edmund Husserl called fulfilment in which we find something to be as we think it to be. His book covers a wide range of central topics in contemporary philosophy of mind, epistemology and traditional phenomenology. It is essential reading for contemporary analytic philosophers of mind and phenomenologists alike.

Phenomenology and the Norms of Perception Maxime Doyon, 2024 In philosophy perception is usually evaluated considering epistemological concerns about truth and falsity. Doyon suggests instead that it is governed by different immanent perceptual norms that are not disconnected from reality; rather they tell us how our experience of reality is shaped. This book explores these ideas and their implications.

The Routledge Handbook of Phenomenology and Phenomenological Philosophy Daniele De Santis, Burt C. Hopkins, Claudio Majolino, 2020-08-24 Phenomenology was one of the twentieth century's major philosophical movements and it continues to be a vibrant and widely studied subject today with relevance beyond philosophy in areas such as medicine and cognitive sciences. The Routledge Handbook of Phenomenology and Phenomenological Philosophy is an outstanding guide to this important and fascinating topic. Its focus on phenomenology's historical and systematic dimensions makes it a unique and valuable reference source. Moreover, its innovative approach includes entries that don't simply reflect the state of the art but in many cases advance it. Comprising seventy-five chapters by a team of international contributors, the Handbook offers unparalleled coverage and discussion of the subject and is divided into five clear parts: Phenomenology and the history of philosophy; Issues and concepts in phenomenology; Major figures in phenomenology; Intersections; Phenomenology in the world. Essential reading for students and researchers in philosophy studying phenomenology. The Routledge Handbook of Phenomenology and Phenomenological Philosophy is also suitable for those in related disciplines such as psychology, religion, literature, sociology and anthropology.

Phenomenology Walter Hopp, 2020-06-01 The central task of phenomenology is to investigate the nature of consciousness and its relations to objects of various types. The present book introduces students and other readers to several foundational topics of phenomenological inquiry and illustrates phenomenology's contemporary relevance. The main topics include consciousness, intentionality, perception, meaning and knowledge. The book also contains critical assessments of Edmund Husserl's phenomenological method. It argues that knowledge is the most fundamental mode of consciousness and that the central theses constitutive of Husserl's transcendental idealism are compatible with metaphysical realism regarding the objects of thought, perception and knowledge. Helpful tools include introductions that help the reader segue from the

previous chapter to the new one chapter conclusions and suggested reading lists of primary and some key secondary sources

Key Features Elucidates and engages with contemporary work in analytic epistemology and philosophy of mind Provides clear prose explanations of the necessary distinctions and arguments required for understanding the subject Places knowledge at the center of phenomenological inquiry

Wilfrid Sellars and Phenomenology Daniele De Santis, Danilo Manca, 2023-06-13 Wilfrid Sellars tackled the difficult problems of reconciling Pittsburgh school style analytic thought Husserlian phenomenology and the Myth of the Given This collection of essays brings into dialogue the analytic philosophy of Wilfrid Sellars founder of the Pittsburgh school of thought and phenomenology with a special focus on the work of Edmund Husserl The book's wide ranging discussions include the famous Myth of the Given but also more traditional problems in the philosophy of mind and phenomenology such as the status of perception and imagination nature of intentionality concept of motivation relationship between linguistic and nonlinguistic experiences relationship between conceptual and preconceptual experiences Moreover the volume addresses the conflicts between Sellars's manifest and scientific images of the world and Husserl's ontology of the life world The volume takes as a point of departure Sellars's criticism of the Myth of the Given but only to show the many problems that label obscures Contributors explain aspects of Sellars's philosophy vis vis Husserl's phenomenology articulating the central problems and solutions of each The book is a must read for scholars and students interested in learning more about Sellars and for those comparing Continental and analytic philosophical thought

The Profile of Imagining Robert Hopkins, 2024-03-20 What is sensory imagining and what role does it play in our lives How does visualizing a castle running through a tune in one's head or imagining the taste of fish ice cream relate to perceiving such things or to remembering them What are the connections between imagining and agency and how does it relate to emotion and other affect The Profile of Imagining offers a theory that answers these and many other questions It argues that sensory imagining involves the redeployment of resources central to perception though in a radically different context and to very different effect The result

is a view that explains central features of imagining's phenomenology and functional role including its capacity to capture what it would be like to perceive its objects while acknowledging the many and striking differences between imagining and sensing Hopkins shows how the view can be extended to imagining in other forms especially the imagining of affect and uses it to argue for some surprising conclusions that imagining something is not a way to engage with its aesthetic character and that imagining provokes real feeling much less often than is usually assumed *Merleau-Ponty and Contemporary*

Philosophy of Perception Peter Antich, 2023-08-04 This book draws on Merleau Ponty's phenomenology to develop new and promising solutions to contemporary debates about perception In providing an extension and defense of Merleau Ponty's account of perceptual content and of the relation between perception and the world it demonstrates the value of Merleau Ponty's insights for philosophy of perception today The author focuses on two main topics the contents and the nature of perception In the first half of this book the author tackles debates about the content of perception namely what sorts of properties or features of the world reveal themselves to us in perception and in what modes Drawing on Merleau Ponty's description of perceptual sense the author argues that perception has a unique kind of content which cannot be adequately described in terms of sensations or concepts He then shows how this account of perceptual sense can clarify debates about the richness of perceptual content including whether we can perceive moral properties In the second half he turns to the nature of perception Here he argues that Merleau Ponty's account of perceptual intentionality makes available a powerful combination of the core insights of two main contemporary approaches to this question realism and intentionalism The author shows how this combination can be developed defends it from objections and explains how it is equipped to deal with problems posed by the existence of illusions and hallucinations *Merleau Ponty and Contemporary Philosophy of Perception* will appeal to scholars and advanced students working on phenomenology and the philosophy of perception Horizons of
