Persistent Forecasting Of Disruptive Technologies Report :

Persistent Forecasting of Disruptive Technologies—**"Report 2** National Research Council, Division on Engineering and Physical Sciences, Committee on Forecasting Future Disruptive Technologies, 2010-08-02 The term disruptive technology describes a technology that results in a sudden change affecting already established technologies or markets Disruptive technologies cause one or more discontinuities in the normal evolutionary life cycle of technology This may lead to an unexpected destabilization of an older technology order and an opportunity for new competitors to displace incumbents Frequently cited examples include digital photography and desktop publishing The first report of the series Persistent Forecasting of Disruptive Technologies discussed how technology forecasts were historically made assessed various existing forecasting systems and identified desirable attributes of a next generation persistent long term forecasting system for disruptive technologies This second book attempts to sketch out high level forecasting system designs In addition the book provides further evaluation of the system attributes defined in the first report and evidence of the feasibility of creating a system with those attributes Together the reports are intended to help the Department of Defense and the intelligence community identify and develop a forecasting system that will assist in detecting and tracking global technology trends producing persistent long term forecasts of disruptive technologies and characterizing their potential impact on future U S warfighting and homeland defense capabilities Persistent Forecasting of Disruptive Technologies National Research Council, Division on Engineering and Physical Sciences, Committee on Forecasting Future Disruptive Technologies, 2010-01-15 Technological innovations are key causal agents of surprise and disruption In the recent past the United States military has encountered unexpected challenges in the battlefield due in part to the adversary's incorporation of technologies not traditionally associated with weaponry Recognizing the need to broaden the scope of current technology forecasting efforts the Office of the Director Defense Research and Engineering DDRE and the Defense Intelligence Agency DIA tasked the Committee for Forecasting Future Disruptive Technologies with providing guidance and insight on how to build a persistent forecasting system to predict analyze and reduce the impact of the most dramatically disruptive technologies The first of two reports this volume analyzes existing forecasting methods and processes It then outlines the necessary characteristics of a comprehensive forecasting system that integrates data from diverse sources to identify potentially game changing technological innovations and facilitates informed decision making by policymakers The committee's goal was to help the reader understand current forecasting methodologies the nature of disruptive technologies and the characteristics of a persistent forecasting system for disruptive technology Persistent Forecasting of Disruptive Technologies is a useful text for the Department of Defense Homeland Security the Intelligence community and other defense agencies across the nation

Persistent Forecasting of Disruptive Technologies National Research Council, Division on Engineering and Physical Sciences, Committee on Forecasting Future Disruptive Technologies, 2010-02-15 Technological innovations are key causal

agents of surprise and disruption In the recent past the United States military has encountered unexpected challenges in the battlefield due in part to the adversary s incorporation of technologies not traditionally associated with weaponry Recognizing the need to broaden the scope of current technology forecasting efforts the Office of the Director Defense Research and Engineering DDR E and the Defense Intelligence Agency DIA tasked the Committee for Forecasting Future Disruptive Technologies with providing guidance and insight on how to build a persistent forecasting system to predict analyze and reduce the impact of the most dramatically disruptive technologies The first of two reports this volume analyzes existing forecasting methods and processes It then outlines the necessary characteristics of a comprehensive forecasting system that integrates data from diverse sources to identify potentially game changing technological innovations and facilitates informed decision making by policymakers The committee s goal was to help the reader understand current forecasting methodologies the nature of disruptive technologies and the characteristics of a persistent forecasting system for disruptive technology Persistent Forecasting of Disruptive Technologies is a useful text for the Department of Defense Homeland Security the Intelligence community and other defense agencies across the nation *Persistent Forecasting of Disruptive Technologies*â"Report 2 National Research Council, Division on Engineering and Physical Sciences, Committee on Forecasting Future Disruptive Technologies, 2010-07-02 The term disruptive technology describes a technology that results in a sudden change affecting already established technologies or markets Disruptive technologies cause one or more discontinuities in the normal evolutionary life cycle of technology This may lead to an unexpected destabilization of an older technology order and an opportunity for new competitors to displace incumbents Frequently cited examples include digital photography and desktop publishing The first report of the series Persistent Forecasting of Disruptive Technologies discussed how technology forecasts were historically made assessed various existing forecasting systems and identified desirable attributes of a next generation persistent long term forecasting system for disruptive technologies This second book attempts to sketch out high level forecasting system designs In addition the book provides further evaluation of the system attributes defined in the first report and evidence of the feasibility of creating a system with those attributes Together the reports are intended to help the Department of Defense and the intelligence community identify and develop a forecasting system that will assist in detecting and tracking global technology trends producing persistent long term forecasts of disruptive technologies and characterizing their potential impact on future U S warfighting and homeland defense capabilities

Transatlantic Science and Technology Sabine E. Herlitschka, 2012-08-09 Major societal challenges of a global nature include climate change efficient energy supply environmental sustainability and health care Science moreover international cooperation and collaboration in S T is vital to tackling these issues since no single nation or even region is able to respond adequately by itself Within this context this book addresses recent developments in transatlantic S T cooperation between the European Union and the United States The EU U S relationship dates back to the 1950s with regular EU U S

Summits to assess and develop transatlantic cooperation In the area of S T the EU and U S concluded an S T Cooperation Agreement in 1998 renewed it in 2004 and extended it for another five years in July 2009 The research underlying this study is based on interviews with key stakeholders in the field with an emphasis on potential new opportunities and new mechanisms for increased transatlantic EU U S S T cooperation under current conditions examples of coordinated science diplomacy efforts options for the development of effective joint efforts While the project is focused on European U S relationships it also addresses issues of international S T cooperation involving other regions including Africa and Asia The author highlights the urgency of S T cooperation to address global issues and the evolving roles of government universities and research centers and industry in promoting successful strategies and programs Disruptive Technologies, Innovation and Development in Africa Peter Arthur, Kobena T. Hanson, Korbla P. Pupilampu, 2020-05-29 This book examines how disruptive technologies and innovation underpin the attainment of a broader development agenda in Africa Contributors show how distinctive forms of technological innovation can impact critical development processes For example disruptive technologies can deepen the ongoing democratic and governance waves in Africa specifically in the area of contested elections Similarly innovations in agriculture the environment and energy promote changes in value chain agriculture and the use of sensors to manage e waste and sustainable energy conservation are also transforming established practices Furthermore the role of disruptive technologies and innovation in education health financial services and the nature of paid work cannot be ignored Individually and collectively the authors discuss and highlight the mechanisms and initiatives that can contribute to the realization of the development goals of African countries especially in a period where disruptive technologies are rapidly changing how things are done As a result this book which represents one of the most recent systematic efforts to bring together dialogue on disruptive technologies in Africa will be of particular use and benefit to a wide and an eclectic audience S&T Strategies of Six Countries National Research Council, Division on Engineering and Physical Sciences, Standing Committee on Technology Insightâ"Gauge, Evaluate, and Review, Committee on Global Science and Technology Strategies and Their Effect on U.S. National Security, 2010-11-04 An increase in global access to goods and knowledge is transforming world class science and technology S T by bringing it within the capability of an unprecedented number of global parties who must compete for resources markets and talent In particular globalization has facilitated the success of formal S T plans in many developing countries where traditional limitations can now be overcome through the accumulation and global trade of a wide variety of goods skills and knowledge As a result centers for technological research and development R D are now globally dispersed setting the stage for greater uncertainty in the political economic and security arenas These changes will have a potentially enormous impact for the U S national security policy which for the past half century was premised on U S economic and technological dominance As the U S monopoly on talent and innovation wanes arms export regulations and restrictions on visas for foreign S T workers are becoming less useful as security

strategies The acute level of S T competition among leading countries in the world today suggests that countries that fail to exploit new technologies or that lose the capability for proprietary use of their own new technologies will find their existing industries uncompetitive or obsolete The increased access to information has transformed the 1950s paradigm of control and isolation of information for innovation control into the current one of engagement and partnerships between innovators for innovation creation Current and future strategies for S T development need to be considered in light of these new realities This book analyzes the S T strategies of Japan Brazil Russia India China and Singapore JBRICS six countries that have either undergone or are undergoing remarkable growth in their S T capabilities for the purpose of identifying unique national features and how they are utilized in the evolving global S T environment

Sustainable Futures in the Built Environment to 2050 Tim Dixon, John Connaughton, Stuart Green, 2018-01-09 Brings together leading thinking on issues of new professional practice and on the future of a sustainable built environment This book focuses on both construction and development issues and examines how we can transition to a sustainable future by the year 2050 bringing together leading research and practice at building neighbourhood and city levels It deftly analyses how emerging socio economic technological and environmental trends will influence the built environment of the future The book covers a broad spectrum of interests across the scales of buildings communities and cities including how professional practice will need to adapt to these trends The broader context is provided by an analysis of emergent business models and the changing requirements for expert advice from clients Sustainable Futures in the Built Environment to 2050 A Foresight Approach to Construction and Development features chapters covering data and trends including historical data and UK and international case studies policies and practice related to the field current state of scientific understanding key challenges key technological advances including disruptive and systemic technological innovations change issues and critical uncertainties and future visions It provides A strong conceptual framework based on a Foresight approach Discussion of the key data and trends that underpin each chapter Coverage of both construction and property development Specially commissioned chapters by academics and practitioners A synthesis of the main findings in the book and key insights for the future to 2050 Sustainable Futures in the Built Environment to 2050 A Foresight Approach to Construction and Development is an important book for postgraduate students and researchers construction real estate and property development specialists engineers planners architects foresight and futures studies specialists and anyone involved in sustainable buildings

Science Fiction, Disruption and Tourism Ian Yeoman, Una McMahon-Beattie, Marianna Sigala, 2021-12-20 This book examines science fiction s theoretical and ontological backgrounds and how science fiction applies to the future of tourism It recreates and invents the future of tourism in a creative and disruptive manner reconceptualising tourism through alternative and quantum leap thinking that go beyond the normative or accepted view of tourism The chapters focusing on areas such as disruption sustainability and technology draw readers into the unknown future of tourism a future that may be disruptive dystopian or utopian The book

brings a new theoretical paradigm to the study of tourism in a post COVID 19 world and can be used to explore frame and even form the future of tourism It will capture the imagination and inspire readers to address tourism s challenges of tomorrow

Disruptive and Game Changing Technologies in Modern Warfare Margaret E. Kosal,2019-09-27 This book explores and analyzes emerging innovations within today s most cutting edge science and technology S how these impact science and technology policy choices made today and predictions of how science and technology may play a beneficial or deleterious role in the future Some game changing technologies have received global attention while others may be less well known the new technologies discussed within this proposal as well as future discoveries may significantly alter military capabilities and may generate new threats against military and civilian sectors
