People and Predators Defenders of Wildlife, 2012-06-22 Carnivores provide innumerable ecological benefits and play a unique role in preserving and maintaining ecosystem services and function but at the same time they can create serious problems for human populations A key question for conservation biologists and wildlife managers is how to manage the world's carnivore populations to conserve this important natural resource while mitigating harmful impacts on humans In *People and Predators* leading scientists and researchers offer case studies of human carnivore conflicts in a variety of landscapes including rural urban and political The book covers a diverse range of taxa geographic regions and conflict scenarios with each chapter dealing with a specific facet of human carnivore interactions and offering practical concrete approaches to resolving the conflict under consideration Chapters provide background on particular problems and describe how challenges have been met or what research or tools are still needed to resolve the conflicts *People and Predators* will help readers to better understand issues of carnivore conservation in the 21st century and provides practical tools for resolving many of the problems that stand between us and a future in which carnivores fulfill their historic ecological roles

People and Wildlife, Conflict or Co-existence?

Rosie Woodroffe, Simon Thirgood, Alan Rabinowitz, 2005-08-25 Human wildlife conflict is a major issue in conservation As people encroach into natural habitats and as conservation efforts restore wildlife to areas where they may have been absent for generations contact between people and wild animals is growing Some species even the beautiful and endangered can have serious impacts on human lives and livelihoods Tigers kill people elephants destroy crops and African wild dogs devastate sheep herds left unattended Historically people have responded to these threats by killing wildlife wherever possible and this has led to the endangerment of many species that are difficult neighbours The urgent need to conserve such species however demands coexistence of people and endangered wildlife This book presents a variety of solutions to human wildlife conflicts including novel and traditional farming practices offsetting the costs of wildlife damage through hunting and tourism and the development of local and national policies
