Second Grade Saxon Math And Common Core:

The Core Leigh A. Bortins, 2025-10-16 In the past correct spelling the multiplication tables the names of the state capitals and the American presidents were basics that all children were taught in school Today many children graduate without this essential knowledge Most curricula today follow a haphazard sampling of topics with a focus on political correctness instead of teaching students how to study Leigh Bortins a leading figure in the homeschooling community is having none of it She believes that there are core areas of knowledge that are essential to master Without knowing the multiplication tables children can't advance to algebra Without mastery of grammar students will have difficulty expressing themselves Without these essential building blocks of knowledge students may remember information but they will never possess a broad and deep understanding of how the world works In *The Core* Bortins gives parents the tools and methodology to implement a rigorous thorough and broad curriculum based on the classical model including Rote memorization to cement knowledge Systematic learning of geography historical facts and timelines Reading the great books and seminal historical documents instead of adaptations and abridged editions Rigorous training in math and the natural sciences UGC NET Paper 2

Classrooms Sarah M. Butzin, 2018-01-15 Creating Joyful Classrooms is a practical response to the malaise in America s schools created by high stakes testing disrespect for the teaching profession and resources being redirected to charter schools and private school vouchers Classroom teachers feel helpless and students feel hapless Joy has left the building This book offers the antidote to return joy and passion to teaching and learning Whether a beginning teacher or a seasoned veteran this book shows the way back to timeless child centered best practices that engage young children and increase academic achievement As joyful classrooms multiply their success will drive out the poisonous rancor of cynicism and despair to become beacons of hope for children everywhere This book also makes the case for changing the status quo in the elementary school The standard traditional grade school is failing to meet the needs of children growing up in the information age Elementary schools must evolve into multi grade multi dimensional safe havens that challenge children academically while remembering to cherish childhood Based upon the theory of invitational education this book provides specific strategies along with classroom management tools to create highly engaging classrooms for young children It also offers inspiring stories of heroic teachers who beat the odds to bring joy back to school It s not too late for a better tomorrow
